VHF OMNITEST SIGNAL FACILITIES: Experimental VHF omnitest signal facilities have been installed at the New York (LaGuardia 112.0 mc), Chicago (Midway 112.0 mc), and Kansas City (Municipal 113.0 mc) airports. These facilities cannot be used for navigational purposes but permit checking of aircraft navigational VOR receivers during a ramp test or while in flight near the airport. Voice communication is not available on the test signal frequency. The facility radiates a 0° course in all directions with a power output of about 10 watts. The identification consists of continuous dots without voice. Each facility is continuously monitored and will shut down automatically if the 0° course varies by more than one degree from normal or in case the identification fails. Flight checks indicate that the omnitest signal is usable to a distance of about ten miles at minimum instrument altitude although regions of weak and unreliable signal may be encountered at shorter distances. The omnitest signal may be regarded as dependable when there is no flag alarm showing or where no flag alarm is incorporated in the aircraft unit and the identification is received free from interference and noise. Comment from airmen will be appreciated. Please forward same to: Civil Aeronautics Administration, Washington 25, D. C., Attention: W-380.

RECEIVER OMNITEST PROCEDURE - Receivers with omni-Bearing Selectors (OBS)

Tune in omnitest frequency. The "To-From" indicator should read "To" or "From" and the alarm flag, if one is used, should disappear.

Set OBS in vicinity of 0° to center "Deviation" indicator. The "To-From" indicator should read "From" and the difference between 0° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

Set OBS in vicinity of 180° to again center "Deviation" indicator. The "To-From" indicator should read "To" and the difference between 180° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

With the "Deviation" indicator centered in the 180° position rotate OBS clockwise until "Deviation" indicator reads full scale or five dots to left. Note OBS reading. Next rotate OBS counterclockwise until "Deviation" indicator reads full scale or five dots to right. Note OBS reading. The difference between the two OBS readings is a measure of receiver course sensitivity.

If instrumentation includes a radio magnetic indicator (RMI), the pointer on this instrument connected to the receiver being checked should be observed. This pointer should indicate 180° ± 1 degree regardless of the setting of the OBS.

AUTOMATIC INDICATING RECEIVERS: Automatic indicating receivers do not have an Omni-Bearing Selector or a "To-From" indicator and have no ambiguity. The only course that can be checked is the one indicated when the equipment is receiving the 0° (Magnetic north) radial from the station, which is automatically indicated when the receiver is turned on and tuned to the correct signal frequency. Either 0° or 180° will be indicated depending on the sensing designed into the particular receiving equipment (as described in the instruction book for that equipment).

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed:

Radio Call	Frequency
Albuquerque Center	120.3 mc
Atlanta Center	120.3 mc
Boston Center	120.3 mc
Chicago Center	120.3 mc
Cincinnati Center	120.3 mc
Cleveland Center	120.3 mc
Denver Center	120.3 mc
Detroit Center	118.9 mc
Ft. Worth Center	120.3 mc
Jacksonville Center	120.3 mc
Kansas City Center	120.3 mc
New York Center	118.9,120.7 mc
Oakland Center	120.3 mc
Pittsburgh Center	118.9 mc
St. Louis Center	118.9 mc
Salt Lake City Center	120.3 mc
San Antonio Center	120.3 ,137.88 mc
Seattle Center	120.3 mc
Washington Center	119.7,120.3,135.0,135.9,136.8,132.3 mc

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no flights into or over foreign territory shall be made without authorization from the foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtin countries.

FLIGHT INFORMATION MANUAL: A new edition of this manual has been prepared and is now being printed. This issue, Volume 5, Number 2, will supersede that dated August 1, 1950, and should be ready for distribution to subscribers shortly after July 15.

AERONAUTICAL ADVISORY STATIONS (FREQUENCY 122.8 mc): This frequency is known in some areas as the "private flyers frequency" and also as "UNICOM". Licenses for ground stations and aircraft are now being issued by the FCC subsequent to receipt of application for license from private pilots and airport operators eligible to use the frequency Under the FCC rules, private aircraft may use 122.8 mc for communication with aeronautical advisory stations and between private aircraft themselves while in flight. Particular attention is invited to Section 9.1001 which follows:

"9.1001 Eligibility for Station License. Authorization for aeronautical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station. Only one Aeronautical Advisory station will be authorized at a landing area."

The scope of service to be rendered under FCC rules for the ground station is: "9.1004 Scope of Service. (a) Communications shall be limited to the necessities of safe and expeditious operation of aircraft. The service shall be advisory in nature, pertaining to the condition of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations. (b) Aeronautical Advisory stations shall not be used for the control of aircraft."

Airport operators interested in providing this service may obtain further details from the nearest FCC or CAA field office.

DVFR FLIGHT PLANS: When an IFR flight plan is canceled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

DANGER AREA DESIGNATIONS: The following Danger Area amendments shall be effective as dated, unless otherwise advised:

AMENDMENT NO. 77 (July 26, 1951)

The Camp Campbell, Kentucky, area, published on April 21, 1949, in 14 F. R. 1913, is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 36-44-00, long. 87-29-00; SE to lat. 36-33-00, long. 87-22-00; due W to long. 87-50-00; due N to lat. 36-44-00; due E to lat. 36-44-00, long. 87-29-00, point of beginning.

AMENDMENT NO. 78 (July 28, 1951)

The Camp Gordon, Georgia, area, published on January 3, 1951, in 16 F. R. 4, is amended by changing the "Designated Altitudes" column to read: "Unlimited", and by changing the "Time of Designation" column to read: "Continuous".

ALASKA FLIGHT INFORMATION MANUAL: Because the last edition arrived so late from the printers the issue scheduled for July 15, will not be published. The next edition is scheduled for publication October 15, 1951.

INSTRUMENT APPROACH PROCEDURES: For changes in initial approach altitudes for instrument approach procedures due to range course realignments at Albany, N. Y., Syracuse, N. Y., Utica, N. Y., Augusta, Me., Bangor, Me., Millinocket, Me. See NOTAM Section under above locations.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
- New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (3-19)
ANNISTON-RADIO: Omnirng gnd-checked only. (4-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions.
BIRMINGHAM-RADIO: June 25, omnirng shut down until approx Sept. 22 - relctn.
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. (5-23) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
EVERGREEN-RADIO: June 5, omnirng shut down until approx July 20 - modernization.
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn. (5-10)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20) Rnwy 5-23 clsd (const). (5-7)
MONTGOMERY-RADIO: A maximum of one half degree in excess of allowable error will be found in E sector omnirng between radials 90° and 118°. (6-14)
MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 18-36 inop. (3-19)
TUSCALOOSA-RADIO: Omnirng flgt-checked, oper normal. (7-2)
[redacted]: ✈ DAVIS-MONTHAN AFB (TUCSON)-RADIO: USAF VHF/DF placed in opern. Freqs: 121.5,138.42,136.80 mc. Hrs of opern: 0800-1600 Mon-Fri; 30 min notice other hrs. (6-29)
DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (4-2)
LUKE AFB (PHOENIX): Ctn - exten const all rnwys. (2-19) Rnwy 3-21 clsd (const). (5-2)
PHOENIX-SKY HARBOR ARPT: Taxiway and portion of airline ramp N of Rnwy 8L-26R clsd. Rnwy 8L-26R clsd xcpt for taxying. Use Rnwys 3-21 and 8R-26L only. (7-2)
[redacted]: BENTON ARPT: W half N/S Strip clsd (const). (6-12)
BENTONVILLE ARPT: 51' bcn twr being erected E side adj to N end of hangar. (4-13)
BRINKLEY-FEDERER MEMORIAL ARPT, SITE 37, DAL-LGU:. Clsd ngts. Rows of dirt on SW end NE/SW Strip, use emerg only. (5-17)
FAYETTEVILLE-RADIO: July 5, omnirng flgt-checked, opern normal. (7-5)
FAYETTEVILLE ARPT: 75' twr being erected NW corner between hangar and hwy. (5-8)
FLIPPIN-RADIO: Omnirng flgt-checked July 8, opern normal. About Aug 6, omnirng will be shut down until approx Oct 29 - modernization. (7-14)
FT. SMITH ARPT: Equip. on W end E/W Rnwy. (4-9)
LITTLE ROCK-ADAMS FLD-TOWER: Transmission and reception poor on all VHF freqs S to W account obstns near temp twr until approx Aug 1, Apch ctl on 353 kc shut down until approx Aug 1. (6-8) FLD: Ctn lndg N or NE, vision of ctl twr partially obstd. (5-14) Lmtd NG svcg. (10-24)
**TEXARKANA ARPT: Two 267' twrs for Rdo Stn KOSY erected 6 mi SSW (196° T) at lat 33-22-30, long. 94-01-00. (6-22)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
[redacted]: ARCATA ARPT: Cancel. notam. (7-16) Data rcvd too late for deletion of + in Directory of Airports.
BAKERSFIELD-RADIO: Omnirng has slight to moderate scalloping in SE quad 80° to 123°.
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft xcpt on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)

CALIFORNIA CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CAMP COOKE (LOMPOC): Authorized visiting acft enter on heading of 290° at 2,000' from town of Lompoc, to avoid active firing rngs. (6-25)
CASTLE AFB (MERCED)-RADIO: USAF LF rng unreliable. (6-27)
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (3-13)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CRESCENT CITY-DEL NORTE CO. ARPT: Drifting sand across W end taxi strip leading to Rnwy 11. Use rnwy for taxying only. (5-18)
CULVER CITY-HUGHES ARPT: Clsd trans acft xcpt on prior permission. (7-4)
EDWARDS AFB (MUROC): Lctd within a danger area. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (4-23)
FORT ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
✱FORTUNA-RADIO: Bear., dist VOR to Rohnerville Arpt: 128°, 9.4 mi. (7-2)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (6-26)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (4-5)
✱LOS ANGELES-RADIO: Visual-aural rng has moderate scalloping in N sector. (7-12) July 6, automatic voice ident feature commd on La Habra FM.
LOS ANGELES-AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Soon transmitter and rcvr 120.3 mc will be commd. (7-12)
✱LOS ANGELES INTERNATIONAL ARPT-TOWER: Effect. Apr 9, voice communs may be
** interrupted for short periods during new twr const. June 27, ASR and PAR inop. PAR will also serve Rnwy 25R when it resumes opern from new twr lctn. (7-12) July 9, lclzr and glide path transferred from Rnwy 25L to Rnwy 25R. Lclzr lctd 11,000' W of apch end of Rnwy 25 R aligned on centerline. (7-12) FLD: Green threshold lgts on apch end Rnwy 7L now lctd 400' E of rnwy bndry. (7-12) Rnwy 7R-25L usable portion reduced to 4500' from apch end 25L, const across W end. Rnwy 25L clsd for take-offs and Rnwy 7R clsd lndgs 0700-1700 daily xcpt Sat and Sun. Rnwy 4-22 clsd (const). Equip. on and adj const area. Use paved areas only. Two green transverse bar lgts mrk threshold Rnwy 25L. Because of new twr const approx 1/2 mi of tfc pat S of arpt not visible to twr controllers. (7-12)
MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1hr.(1-15)
MATHER AFB-TOWER: USAF GCA inop. (4-25)
**MERIDIAN-ROMELSBACHER ARPT: ABANDONED. (6-20)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21)
NEEDLES ARPT, SITE 25A, LAX-AMA: 80 octane gas not avail. (6-15)
NORTON AFB (SAN BERNARDINO): Ctn-equip on fld days. (3-29)
OAKLAND-RADIO: Omnirng maximum usable dist, 40 mi N thru E at minimum inst alt. (6-18)
OAKLAND ARPT: Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. (3-8) New 100' ctl twr under const. (6-18)
ONTARIO-RADIO: Soon omnirng will be commd. Freq: 117.0 mc. Ident: ONT. Stn lctn: lat 33-56-11, long. 117-36-11. Class: BVOR. Monitoring category (1). (6-29)
SAN DIEGO-RADIO: Omnirng has light to moderate scalloping in all quads. (6-12)
SAN DIEGO COUNTY (BROWN) FLD: Being reactivated as Navy fac. (6-27)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (2-21)
SAN DIEGO NAS SEAPLANE BASE: Sealane mrkrs under const. Perm pile-mounted day mrkrs and seadrome lgts are being installed in S San Diego Bay to delineate the sealanes. There are two sealanes each 1000' wide, extending NW/SE 14, 875'; E/W, 9,872'. Bndrys and ends of lanes mrkd, day, ngt. Ctn during lndg and take-off. It is also noted that due to mrkrs being pile-mounted the height above water will vary with the state of the tide.
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)
SAN FRANCISCO ARPT-TOWER: CAA ILS Lclzr operg with slight scalloping. About July 18 thru 20 will be shut down days - ngts operg gnd-checked basis. (7-11) FLD: Apch lgts inop. Rnwys clsd days intermittently. Taxi with ctn. Equip on fld days. (6-27)
SANTA ANA MCAF-LTA: Hrs opern: 0800-1630, Mon-Fri and to sunset on 30 min req. 0800-1200, Sat and to sunset on 30 min req. 0800 to sunset Sun on 30 min req. (5-18)
SANTA BARBARA-RADIO: Soon omnirng will be commd. Freq: 114.9 mc. Ident: SBA. Lctd lat 34-30-36, long. 119-46-13. Class will be: VORW. (6-8)
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end Rnwy 25 perm clsd to acft with 20,000 lbs or more gross wt. Threshold lgts Rnwy 7 inop. Extension apch end Rnwy 7 usable days only. (6-1)
SANTA MONICA ARPT: 16" elevated lgts being installed both sides Rnwy 3-21. Rnwy 4-22 clsd. Rnwy 3-21 hazardous-const. (6-26)
SONORA-COLUMBIA ARPT: NW/SE Strip clsd. (7-2)
COLORADO: SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U.S. Army Dist Engr. John Martin D am lctd 1 mi SSE of Hasty, Colo. (9-25)
COLORADO SPRINGS: Artillery firing being conducted in entire area of Camp Carson Military Reservation during all hrs thru July 31, 1951. Area extends from lat 38-45-00 on N to lat 38-30-00 on S, and from long. 104-43-00 on E to State Hwy #115 on W. Ctn advised all acft operg on Amber Arwy #3 in vcnty; operns should be conducted E of S crs of Colorado Springs LF rng.
DENVER NAS (BUCKLEY FLD)-RADIO: Navy X-band Radar Bcn, code 2-1-1, inop.(4-26)
DENVER NAS (BUCKLEY FLD): Const S end Rnwy 14-32. (6-24)
LAMAR-RADIO: Omnirng radials displaced counterclockwise as follows: 345° to 15° displaced 4°, 142° to 150° displaced 4°, 126° to 216° displaced 6°. (6-15)
PUEBLO: Ordnance depot approx 17 mi E at lat 28-16-53, long. 104-18-09, conducting all types of demolition work 0800-1630 daily, Mon thru Fri, during month of July.(5-31)
PUEBLO-RADIO: Omnirng radials from 342° to 50° displaced up to 6° clockwise. Radials from 105° - 190° displaced up to 5° counterclockwise. (6-15)
PUEBLO ARPT #2: Ctn-lndg Rnwy 26 and take-off Rnwy 8. 30' obstn in State Fairgrounds lctd 700' E and in line with Rnwy 8-26. (7-13)
CONNECTICUT: BRIDGEPORT ARPT: Const ends Rnwys 6, 11 and 16. First 1000' of these rnwys ends subject to closure with min notice. Equip on fld. (4-14)
E. HARTFORD-RENTSCHLER ARPT: VFR flgt test operns days all alts in 75 mi radius. (1-4) 80' crane 500' NW apch end Rnwy 4 days. (5-14)
HARTFORD-RADIO: Auto. rng monitor. discontd. (2-21)
NEW HAVEN ARPT: Taxi strip from Admin. Bldg to N end Rnwy 1-19 clsd. Const N end Rnwy 1-19. (6-15)
**STAMFORD-SCHOFIELD SEAPLANE BASE: Formerly carried as Fairchester Seaplane Base. (5-8)
**WESTPORT SEAPLANE BASE: Delete from Seaplane Directory - personal use. (7-3)
WINDSOR LOCKS-BRADLEY FLD: 80' lgtd Admin Bldg under const S end. (6-23)
DELAWARE: DOVER AFB-RADIO: USAF rng gnd-checked only. Reliable for homing only. (12-12)
DOVER-SUNGLO FLD: Hwy const adj to the W. (7-10)
FORT MILES: Overwater Controlled Firing Area in vcnty formerly approved on a seasonal basis, is now rqrd on a yearly basis. Area is described as follows: Beginning at lat 38-45-30, long. 75-01-24; SE to lat 38-43-00, long. 74-57-10; SSE to lat 38-38-50, long. 74-55-33; W to lat 38-37-54, long. 75-03-50; northerly along the shoreline at lat 38-40-45, long. 75-04-09; NE to point of beginning. Time of Use: May to Oct 1300-1900, Nov to Dec 0800-1730. Activities: Anti-acft firing. Controlling Agency: 2nd Army, Ft. Miles, Dela. Effective Date: Jan 5, 1951.
**GEORGETOWN-SUSSEX COUNTY ARPT: July 4, rot. bcn discontd.
WILMINGTON-RADIO: Z mrkr shut down - maintenance. (6-27)
✱WILMINGTON-NEW CASTLE CO. ARPT-RADIO: USAF VHF/DF commd. Freq: 126.18 mc. Voice call: New Castle Co. DF. (7-5) This corrects AIRGI Vol. 6, No. 8, dated July 2, 1951

DELAWARE: WILMINGTON-NEW CASTLE CO. ARPT: Jets and other mil acft operg daily. Two 465' unlgtd bridge twrs being erected across Delaware Riv 4 mi ENE. (3-23)

DIST OF COLUMBIA: ANACOSTIA NAS-RADIO: Navy VHF/DF inop - repairs. (4-30)

ANACOSTIA NAS: All pilots clearing to Anacostia NAS under IFR should be thoroughly familiar with all Washington area rdo and communs facs, the reporting points, all holding pats, and let down procedures, inclg "TIMED APCHS". (11-1)

BOLLING AFB: Lmtd trans quarters. (7-12)

WASHINGTON-SPECIAL NOTICE: CAA regards Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac River. Acft remain clear of U. S. Naval Medical Center, Bethesda, Md., lat 39-00-30, long. 77-05-30. Beginning June 11, avoid low flying over Watergate area lctd adj Memorial Bridge and 6 mi N of Washington Nat'l Arpt-concert.

WASHINGTON-RADIO-SPECIAL NOTICE: The following facs are to be used as an aid to any acft, military or civilian, that is known or believed to be in distress:

WACO-RADIO: **About July 30,** omnirng will be shut down until approx Oct 22 - moderniza-tion. (6-13)
****WAELDER-DENHAM FLYING B RANCH:** New **fld. Lat** 29-46-30, long. 97-25-15. (6-22)
WAXAHACHIE-DONS AIRPARK: 200' rdo twr being erected 1 mi NW (331° T) at lat 32-23-18, long. 96-52-12. (6-29)
WICHITA FALLS-RADIO: Omnirng on 112.7 mc inop due to storm. (5-11)
WICHITA FALLS (KELL) ARPT: 195' rdo twr being erected 7 mi SE (150° T) at lat 33-53-40, long. 98-27-00. (6-21). Rnwy 2-20 clsd. 400' N end Rnwy 17L unusable - lnd long past double stripe. Const on ramp. No over-run off ends of rnwys. Longest usable rnwy 5500'. Swell in pavement 1190' from S end Rnwy 35R. Clsd to jet acft ngts xcpt emerg. (6-1) Jet acft do not lnd short of paved surface. Approx 6' dip off S end of Rnwy 35R. (6-16)
WINK-RADIO: Omnirng radials 40° clockwise thru 90° have moderate bends and scalloping within 15 mi stn. (2-9)
UTAH: **BRYCE CANYON INT FLD:** Const NE end NE/SW Rnwy. Equip. near rnwy. (5-21)
HILL AFB (OGDEN): Ctn - const S end Rnwy 16-34. (12-6) Rnwy 13-31 clsd. (6-15)
JORDAN NARROWS: Artillery firing will be conducted in temp Controlled Firing Area lctd approx 20 mi SSW of Salt Lake City from July 9 thru July 22, 1951. Area is defined as follows: N bndry: lat 40-27-30; S bndry: lat 40-23-30; E bndry: long 111-56-45; W bndry: long. 112-06-00. Firing will be conducted only during daylgt hrs when there are no clouds below 14,000' MSL greater than scattered and when visibility is at least 10 mi. Maximum trajectory will be 15,000' above the surface and firing directed toward the W. Although local precautionary measures will be taken, acft in vcnty should follow the E side of the S crs of Salt Lake City rng.
ROOSEVELT ARPT: Strip 4-22 clsd. (3-7)
TOOELE: Demolition of explosives being conducted in area approx 3 mi SW, Mon thru Fri each week, and will cont. indefinitely. Area is bounded as follows: N bndry - lat 40-31-04; S bndry - lat 40-29-36; E bndry - long. 112-20-53; W bndry - long. 112-22-23. (10-17)
****VERNAL ARPT:** 36'' clear and green bcn installed and opers sunset-sunrise. (7-10)

VERMONT: SPECIAL NOTICE: Arpt condition info avail by calling Vt. Aero Comm Tel. Montpelier 1500, 0830-1630, Mon thru Fri or CAA Communs Stn, Barre-Montpelier Arpt anytime (Tel. Montpelier 676). Acft in flgt call Montpelier Rdo. (4-4)
BARRE-MONTPELIER ARPT: Rnwy 17-35 clsd (const). (7-12)
BURLINGTON-SPECIAL NOTICE: Acft operg on or in the vcnty of the Burlington Arpt rqrd to have rdo rcvr operg on freq 278 kc and/or 118.3 mc. (3-15)
BURLINGTON ARPT: Vermont NG P-47's use NW/SE Rnwy only. (5-23) Turf lndg area clsd. (12-1)
RUTLAND ARPT: Wind tee tied to rnwy to be used during Colonial Airlines lndgs and take-offs. Rnwy may be cross-wind at those times. (5-18)
VIRGINIA: BLACKSTONE AAF: E/W Rnwy unlgtd. Unlgtd wind sock installed 350' SW and wind tee installed 700' SW of intsxn of E/W Rnwy and N/S Taxi Strip. Ctn - const. Mil maneuvers daily Mon-Fri 0900-1130, 1300-1630. Non-rdo equipped acft circle arpt 3 times and rdo equipped acft ctc Blackstone Rdo before attempting to lnd. (5-10)
CHARLOTTESVILLE-UNIVERSITY OF VA. ARPT: E/W Strip clsd. Lnd within mrkrs. (5-17)
CHINCOTEAGUE NAF: White bcn opers ngts. Use rnwys, taxi strips only, soft shoulders. Pilotless rdo-ctld acft operg days, Mon thru Fri. Other acft in vcnty, ctn. Red rot. bcn opers when fld clsd. It is also turned on when fld is under positive ctl for opers of rdo-ctld acft, target tows, and similar hazardous operns. No taxiway lgtg avail. (1-18)
DAHLGREN NAF: Acft to or from this fld file and close flgt plans with MCAS Quantico while airborne. (2-21)
DANVILLE-RADIO: Omnirng radials 30° thru 180° to 230° usable dist 40 mi. (5-11) Omnirng gnd checked only, awaiting flgt-check. (6-12)
**ELLERSON-UNIVERSAL FLD: New fld. Lat 37-37-45, long. 77-23-15. (3-21)
**FENTRESS NAAS: Correct lat 36-42-15, long. 76-08-00. (4-27)
FRONT ROYAL-RADIO: Omnirng 113.5 mc gnd-checked only. (11-27) Omnirng radials 120° to 160°; 175° to 200°; 220° to 226°; 270° to 10° - usable to 40 mi at 4000' MSL. (2-9)
GORDONSVILLE-RADIO: Omnirng usable dist 50 mi at min inst alt. Minor crs roughness all quads due to terrain. (6-28)
★LANGLEY AFB-RADIO: USAF Mil Arwys Stn opers 2862, 4765 kc. (7-13)
LAWRENCEVILLE-RADIO: Omnirng radials from 185° - 240° usable only to 25 mi at minimum enroute inst alt. (4-9)
LEESBURG ARPT: 10" survey stakes along each side E/W Strip. 6" open ditch at intsxn centerline NE/SW Strip with N side E/W Strip. (6-11)
LYNCHBURG-RADIO: June 1, omnirng shut down until approx Sept 5 - relctn. (6-1)
**MARTINSVILLE-MORRIS FLD: New fld. Lat 36-37-45, long. 79-58-00. (4-26)
MOUNT VERNON: See special notice under District of Columbia.
NORFOLK ARPT: All sod areas clsd. Taxying N side Rnwy 13-31 prohibited. (5-10)
NORFOLK NAS (EAST FLD): Rnwy 10-28 clsd (const). (6-4) Ctn - Rnwys 5 and 10 partially obstd by 115' mrkd twrs being erected NE edge mat between ends rnwys. (6-27)
**POWHATAN-PLAINVIEW ARPT: New fld. Lat 37-32-15, long. 77-53-00. (4-25)
PULASKI-RADIO: Omnirng radials 305° clockwise to 15° usable 25 mi at minimum inst alt. 15° thru 55° and 195° thru 210° usable 40 mi at minimum inst alt. (2-9)
QUANTICO MCAS: Const. Ditches across and alongside N/S Taxiway. (5-9)
RICHMOND-BYRD FLD-TOWER: About July 25, twr freq will be changed from 278 kc to 396 kc. (7-2)
ROANOKE ARPT: Bndry lgts inop. (5-7)
TAPPAHANNOCK-RADIO: About July 25, LF rng freq will be changed from 248 kc to 275 kc. (7-2)
WILLIAMSBURG-SCOTT ARPT: Intermittent const WNW end WNW/ESE Strip. (5-29)
WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area and lakes. (1-12)
ARLINGTON ARPT: Gliders operg Sun and legal holidays. Use rnwy designated by wind tee for take-offs and lndgs. (7-10)
BELLINGHAM-RADIO: Omnirng shut down until approx Aug 15 - relctn to lat 48-56-43, long. 122-34-40. (6-28)
BELLINGHAM ARPT: Pilots of unscheduled and scheduled acft using this fld as an alternate must register at CAA Commun Bldg. (6-8)
ELLENSBURG-RADIO: Omnirng radials 42°, 157°, usable 30 mi; 52° usable 45 mi. (6-9) Usable distance W crs LF rng 45 mi. June 18, LF rng flgt-checked, courses correctly aligned. (7-10)
EVERETT-PAINE FLD: Between 0800-1600 N end Rnwy 16-34 to 3000' beyond being cleared for extension. (7-11)

WASHINGTON: FAIRCHILD AFB (SPOKANE)-RADIO: USAF radar bcn (AN/CPN-6) unreliable (6-25)
FAIRCHILD AFB (SPOKANE): Lmtd maint 0800-1700. (11-17)
FORKS ARPT: Ctn - const. Use taxi strip on S side of lndg strip only. (5-25)
HOQUIAM-MOON ISLAND ARPT: Soon rot bcn will show white only. (7-10)
KELSO-LONGVIEW ARPT: Bndry lgts inop. (6-11)
McCHORD AFB (TACOMA)-RADIO: Soon the following USAF elliptical-shaped FMs will be commd: Harts Lake FM on S course (10 mi) at lat 46-54-06, long. 122-28-28. Ident: three dashes. McChord FM on N course (8.5 mi) at lat 47-09-31, long. 122-28-31. Ident: one dash. Concurrently CAA Lakeview FM on S course Seattle rng will be perm discontd. USAF VHF/DF oper 0800-1700 daily on trng status only. (3-21) USAF LF rng unreliable beyond 20 mi - all crs have splits and bends 5 to 7° wide; N crs displaced 3°. (4-28)
McCHORD AFB (TACOMA): Trans billeting avail emerg only. (7-27)
MT. VERNON OLF: Clsd to all acft except those permitted by the C. O., Whidbey Island NAS. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (2-21)
**PORT ANGELES CGAS SEAPLANE BASE: Correct lat 48-08-15, long. 123-25-00. A+B. Sealane lgts 1 hr prior req, floodlgts. Comb oper with arpt. Mtns S, stacks S, SW. Ramp, crash boat, beach, haul-out. Driftwood. (4-16)
**PROSSER-BEARDSLEY ARPT: Clear and green Jr. bcn installed and opers sunset to sunrise. (6-29)
SEATTLE-RADIO: Soon Lakeview FM on S course will be discont. (4-26)
SEATTLE-BOEING FLD: 129' rdo twr with supporting 18' ant. being erected 7 mi NNW (339°T) at lat 47-37-37, long. 122-21-16. (6-25) All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. (1-31)
SEATTLE NAS: Acft in tfc are rstd from flgt over the area W of centerline Rnwy 14-32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (2-21)
SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: Lclzr and glide path shut down - rnwy const. (6-6) FLD: Ctn - Rnwy 16 under const. Threshold lgts removed from N end Rnwy 16. Three green lgts spaced 20' intervals each side rnwy, 100' S of N end. Equip. on fld. (4-4)
SHELTON-RADIO: LF rng on 362 kc has limited usable crs dist as follows: S crs 35 mi, SW and N 30 mi each. (1-5)
SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with wind cone S side of fld. When wind cone points 90° to rnwy, take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip. on fld. (10-9)
SPOKANE-GEIGER FLD-TOWER: Interference on LMM freq 201 kc. (12-21) Back course narrow with unflyable bends. (2-26) FLD: Ctn - const both sides Rnwy 2-20. Open ditch W side ramp, mrkd. Ctn taxying at intsxns. Equip. on fld. Open ditch rgt side Rnwy 2 from end to midway point and across rnwy. (7-17)
WHIDBEY ISLAND NAS: Rnwys at Ault Fld are black asphaltic concrete and have a capacity of 25,000 lbs. per wheel if tire pressure is under 85 lbs; or 35,000 lbs. if tire pressure is over 85 lbs. (2-21)
WEST VIRGINIA: CHARLESTON-KANAWHA CO. ARPT: Tfc on SW and SE ends of loading ramp and NG hangar area not clrd by twr. Equip. SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd. (5-21)
ELKINS-RADIO: Omnirng has minor crs bends in NE quad. (6-20)
MARTINSBURG-RADIO: Omnirng gnd checked only. (4-6)
MORGANTOWN-RADIO: LF rng flgt-checked, crss correctly aligned. Multiples and fades all crs. June 18, omnirng shut down until approx Sept 14 - relctn.
PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough
WHEELING-RADIO: Soon CAA ILS LOM freq 275 kc will be changed to 293 kc; ident HL and LMM freq will be 275 kc; ident LG. (7-2)
WHEELING-OHIO CO. ARPT: Turf area clsd. Equip. on fld days. Use rnwys, taxiways only. (5-18)
WISCONSIN: CAMP McCOY ARPT: Use N/S Rnwy with rgt hand tfc to S and left hand tfc to N to avoid artillery firing. (7-2)
DRUMMOND-SORENSEN ARPT: Clsd ngts. N/S Strip under const. (5-15)
LA CROSSE-RADIO: Omnirng radials between 314° and 331° unreliable 20 to 30 mi from rng.
**LANCASTER-VESPERMAN ARPT: New fld. Lat 42-51-15, long. 90-41-30. (5-16)

WISCONSIN: MADISON ARPT: Open ditches apch end Rnwys 4 and 36. SW Taxiway clsd 0700 -1800 daily and barricaded at E end. Equip. on fld days. Sod unsafe. Due to non-visibility twr unable to ctl tfc on SE ramp. (7-4)
MANITOWOC ARPT: NE/SW Strip clsd due to const on new N/S Strip. (7-16)
MILWAUKEE-RADIO: June 4, Kenosha FM on S crs shut down until approx June 25-relctn to lat 42-33-08, long. 97-53-36. (6-4)
MILWAUKEE-CURTIS-WRIGHT ARPT: E/W and NE/SW Strips on E side segmented circle clsd. (7-16)
MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 18-36, 2300' long open to lgt acft days only. (5-28)
MILWAUKEE-MAITLAND ARPT: 215' rdo twr being erected 1 mi S (180°T) at lat 43-00-40, long. 87-54-22. (6-26)
PALMYRA ARPT: Clsd (const). (7-16)
PHILLIPS ARPT: Ctn - const. Only 2000' E end E/W Strip avail. Ctn - taxying to bldgs W side of arpt. (5-15)
**TOMAHAWK-McLAREN SEAPLANE BASE: PRIVATE. Ramp, mar. rlwy. SE, SSE blkd.(5-2
**WAUSAU-ALEXANDER SEAPLANE BASE: 4 lndg lanes avail. (5-22)
WYOMING: CASPER-RADIO: Omnirng radials between 10° and 35° from stn unusable at min. inst alt beyong 35 mi.
✱DOUGLAS-RADIO: H fac power changed to less than 50 watts. Class: BMH-DTV. This corrects AIRGI Vol 6, No. 8, dated July 2, 1951. June 11, omnirng shut down until approx Aug 11 - modernization. (6-10)
FORT BRIDGER-RADIO: Soon omnirng will be shut down untill approx Aug 11-modernization (6-27)
GILLETTE ARPT: 50 to 75' W shoulder extending 1500' from N end N/S Strip soft. Soft portion clsd to hvy acft. (6-11)
KEMMERER ARPT: 14-20" grass on all rnwys. (7-6)
LANDER ARPT: Ctn - const. Use NNE/SSW Strip only. (6-14)
MOORCROFT-RADIO: Omnirng shut down -modernization. (5-15)

ROCK RIVER-RADIO: About July 23, omnirng will be shut down until approx Sept 21 - modernization. (6-27)
ROCK SPRINGS-RADIO: July 5, omnirng shut down until approx Sept 9 - modernization.
WHEATLAND ARPT, SITE 6, CYS-GTF: About Aug 1, fld will be discontd. (7-2)
WHEATLAND, BCN SITE 6, CYS-GTF: About Aug 1, site will be discontd. (7-2)

MINIMUM EN ROUTE INSTRUMENT ALTITUDE AMENDMENTS: Effective July 6, 1951, unless otherwise advised, minimum en route instrument altitudes will be amended as follows:

(1) Green civil Airway No. 2 is amended by adding:

FROM	TO	MIN ALT
Bismarck, N. D. (VOR) Via direct or 15° N alt radial	Jamestown, N. D. (VOR) Via direct or 15° N alt radial	3,400
Jamestown, N. D. (VOR) Via direct or 15° N alt radial	Fargo, N. D. (VOR) Via direct or 15° N alt radial	2,800
Fargo, N. D. (VOR) Via direct or 15° NE alt radial	Alexandria, Minn. (VOR) Via direct or 15° NE alt radial	2,800
Alexandria, Minn. (VOR) Via direct or 15° NE alt radial	Minneapolis, Minn. (VOR) Via direct or 15° NE alt radial	*2,600
2,900' - Minimum continuous VOR reception altitude		
La Crosse, Wis. (VOR) Via direct or 15° NE alt radial	Lone Rock, Wis. (VOR) Via direct or 15° NE alt radial	2,500

(2) Green Civil Airway No. 3, is amended by adding:

Naperville, Ill. (VOR) Via radial 120	Chicago Heights, Ill. (VOR) Via radial 300	2,300
Chicago Heights, Ill. (VOR) Via direct or 15° S alt radial	Millersburg, Ind. (VOR) Via direct or 15° S alt radial	2,100
Millersburg, Ind. (VOR) Via radial 90	Archbold, Ohio (INT)	*2,300
3,000' - Minimum continuous VOR reception altitude		
Archbold, Ohio (INT)	Toledo, Ohio (VOR) Via radial 273	2,000
Millersburg, Ind. (VOR) Via radials 75 or 105	Toledo, Ohio (VOR) Via radials 258 or 288	*2,300
3,000' - Minimum continuous VOR reception altitude		
Toledo, Ohio (VOR) Via radial 095	Sandusky, Ohio (INT)	2,000
Sandusky, Ohio (INT)	Cleveland, Ohio (VOR) Via radial 278	1,900
Cleveland, Ohio (VOR) Via direct or 15° N alt radial	Youngstown, Ohio (VOR) Via direct or 15° N alt radial	2,600
Toledo, Ohio (VOR) Via radial 121	Int. Toledo, Ohio (VOR) Radial 121 & W crs Wellington, Ohio (VAR)	2,200
Int. Toledo, Ohio (VOR) Radial 121 & W crs Wellington, Ohio (VAR)	Wellington, Ohio (VAR) Via VAR	2,200
Wellington, Ohio (VAR) Via VAR	Int. E crs Wellington, Ohio (VAR) & Youngstown, Ohio (VOR) radial 255	2,600
Int. E crs Wellington, Ohio (VAR) & Youngstown, Ohio (VOR) radial 255	Youngstown, Ohio (VAR) Via radial 255	2,600

(3) Green Civil Airway No. 4 is amended by adding:

#St. Louis, Mo. (VOR) via direct or 15° N & S alt radials	Loogootee, Ill. (VOR) Via direct or 15° N & S alt radials	2,000
Loogootee, Ill. (VOR) Via direct or 15° N & S alt radials	Terre Haute, Ind. (VOR) Via direct or 15° N & S alt radials	2,000
Terre Haute, Ind. (VOR) Via direct or 15° N alt radial	Indianapolis, Ind. (VOR) Via direct or 15° N alt radial	2,100
Indianapolis, Ind. (VOR) Via direct or 15° N alt radial	Dayton, Ohio (VOR) Via direct or 15° N alt radial	2,300
Dayton, Ohio (VOR) Via direct or 15° N alt radial	Columbus, Ohio (VOR) Via direct or 15° N alt radial	2,300

#This route is associated with this airway, since the route lies within the control area established for this airway.

(4) Amber Civil Airway No. 5 is amended by adding:

St. Louis, Mo. (VOR) Via direct or 15° W alt radial	Springfield, Ill. (VOR) Via direct or 15° W alt radial	2,000
Springfield, Ill. (VOR) Via direct or 15° E alt radial	Pontiac, Ill. (VOR) Via direct or 15° E alt radial	2,200
Pontiac, Ill. (VOR) Via direct or 15° E alt radial	Naperville, Ill. (VOR) Via direct or 15° E alt radial	2,000
Int. Milwaukee, Wis. (VOR) Radial 179 & Chicago Heights, Ill. (VOR) radial 340	Milwaukee, Wis. (VOR) Via radial 179	2,100

(5) Amber Civil Airway No. 6 is amended by adding:

Nashville, Tenn. (VOR) Via direct or 15° E alt radial	Bowling Green, Ky. (VOR) Via direct or 15° E alt radial	2,000
Bowling Green, Ky. (VOR) Via radial 45	Louisville, Ky. (VOR) Via radial 187	2,200
Bowling Green, Ky. (VOR) Via 15° E alt radial	Louisville, Ky. (VOR) Via 15° E alt radial	*2,200
2600' - Minimum continuous VOR reception altitude		
Louisville, Ky. (VOR) Via direct or 15° E alt radial	Cincinnati, Ohio (VOR) Via direct or 15° E alt radial	2,400
Columbus, Ohio (VOR) Via direct or 15° W alt radial	Mansfield, Ohio (VOR) Via direct or 15° W alt radial	2,500
Mansfield, Ohio (VOR) Via direct radial	Cleveland, Ohio (VOR) Via direct radial	2,600

(6) Red Civil Airway No. 11 is amended by adding:

St. Louis, Mo. (VOR) Via direct or 15° S alt radial	Evansville, Ind. (VOR) Via direct or 15° S alt radial	*2,100
4,400' - Minimum continuous VOR reception altitude		
Evansville, Ind. (VOR) Via radial 76 or 15° N alt radial	Louisville, Ky. (VOR) Via radial 267 or 15° N alt radial	*2,100
2,500' - Minimum continuous VOR reception altitude		

(7) Red Civil Airway No. 12 is amended by adding:

Naperville, Ill. (VOR) Via radial 88	Int. Chicago (Midway), Ill. ILS localizer crs & Chicago Heights, Ill. (VOR) radial 331	2,300
Int. Chicago (Midway), Ill. ILS localizer crs & Chicago Heights, Ill. (VOR) radial 331	South Bend, Ind. (VOR) Via radial 271	2,300
South Bend, Ind. (VOR) Via radial 75	Int. South Bend, Ind. (VOR) Radial 75 & Millersburg, Ind. (VOR) radial 344	2,000
Int. South Bend, Ind. (VOR) Radial 75 & Millersburg, Ind. (VOR) radial 344	Litchfield, Mich. (VOR) Via radial 258	2,400
South Bend, Ind. (VOR) Via 15° N alt radial	Litchfield, Mich. (VOR) Via 15° N alt radial	2,400
Litchfield, Mich. (VOR) Via direct or 15° N alt radial	Detroit, Mich. (VOR) Via direct or 15° N alt radial	2,400

(8) Red Civil Airway No. 14 is amended by adding:

Indianapolis, Ind. (VOR) Via direct or 15° W altitude radial	Lafayette, Ind. (VOR) Via direct or 15° W altitude radial	2,100
Lafayette, Ind. (VOR) Via direct or 15° E & W alt radials	Chicago Heights, Ill. (VOR) Via direct or 15° E & W alt radials	2,000
Indianapolis, Ind. (VOR) Via radial 340	Int. Indianapolis, Ind. (VOR) Radial 340 & Chicago Heights, Ill. (VOR) 15° E alt radial 138	*2,100
3,700' - Minimum continuous VOR reception altitude		
Int. Indianapolis, Ind. (VOR) Radial 340 & Chicago Heights, Ill. (VOR) 15° E altitude radial 138	Int. Chicago Heights, Ill. (VOR) 15° E alt radial 138 & Lafayette, Ind. (VOR) 15° E alt radial via Chicago Heights, Ill. 15° E alt radial 138	*2,100
3,700' - Minimum continuous VOR reception altitude		
Chicago Heights, Ill. (VOR) Via radial 331	Int. Chicago (Midway), Ill. ILS localizer crs & Chicago Heights, Ill. (VOR) radial 331	2.000

(7-17-51)

PRIORITY PLAN FOR THE ASSIGNMENT OF ILS LOCALIZER/GLIDE SLOPE FREQUENCIES

To meet the growing need for ILS frequencies and to place the ILS operation in accordance with the standards established by ICAO, the RTCA Special Committee 57 recommended an interim priority plan for the assignment of ILS localizer/glide slope frequencies.

One attractive feature of the plan is that a simple modification of the R89B glide slope receiver makes possible the addition of eight ILS frequency channels. The plan therefore, provides for the period until the new 20 channel glide slope receivers are available. For example, the addition of one new frequency to the R89B receiver makes possible two new ILS frequencies.

Below is a planning chart for adding ILS channels. Reference to the chart clearly indicates the frequency adjustments necessary to make possible the expansion of the ILS frequencies and operation of all ILS within ICAO standards.

Included in the recommendations of SC57 were (1) that the plan be adopted for full implementation by July 1, 1951; (2) that channels 1 through 8 be implemented by local agreement of those concerned at the earliest practicable date on a regional basis; (3) that channels 9 through 12 be implemented subject to the resolution by Special Committee 56 of aeronautical communication requirements.

Implementation dates for commissioning of new frequencies at specific locations have been agreed upon following local coordination and changes have been, or will be, publicized by NOTAM. Special Committee 56 resolved the problem of aeronautical communications requirements, therefore, channels 9 through 12 will also be implemented subject to local coordination.

U. S. PLANNING CHART FOR ADDING ILS CHANNELS

Priority	(ICAO) Channel	Localizer Frequency	Glide Slope Freq.	R89B Glide Slope Receiver Crystal Changes	RC-103 Localizer Receiver Crystal Changes	VOR Receiver 51 or Equivalent
1	23 "Z"	110.3	335.0	OK as is	OK as is	OK as is

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . ..Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. .. VHF middle marker
MOR.. Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL .. Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z . . . . VHF station location marker at a range station.

RADIOTELEGRAPH CODE

FREQUENCY LEGEND

V = 135.9,135.0 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(7-31-51)

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
Alt MSL=Min. alt. over airport.
(D) = Day. (N) = Night. ➔ = New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN addition TO THE FREQUENCIES LISTED. THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

DIRECTORY OF AIRPORTS

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (with AF in Type Column) - a field owned by, leased in whole by U. S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U. S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTE:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil flights.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	C	-Commercial	MG	-Misc. Govt
A	-Army (May also be used by Army Nat'l Guard)	CG	-Coast Guard	N	-Navy
		I	-Intermediate	NG	-Air Nat'l Guard
		M	-Municipal	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

L I G H T
LONGEST RUNWAY
FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available,

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not published, the surface is only (Turf, Gravel), etc,

- (number) - runway is paved (concrete, asphalt or similar type of paving)

sw - allway field

(56) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white; split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Daytable lights (Identified)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or strip
- 5 - Instrument approach (green)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (signalling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs
NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont).

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U. S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(e) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(g) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(l) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(p) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(f) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airmen Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(n) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, USAF Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters USAF ACIS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS. All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS. The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

✓USAF PILOT'S HANDBOOK "FAR EAST": Publication of H. O. 503, Pacific Airways Route Manual, has been discontinued. Coverage of this publication is included in USAF Far East Pilot's Handbook.

✓CHANGE IN VHF CHANNELIZATION: Effective September 1, 1951, VHF/DF service on 137.88 mc will be discont and service conducted on 137.88 mc (Channel C). VHF/DF on freq 173.88 mc will be on secondary basis for use of freq by Mil Airways; and for GCA by 4-channel equipped acft.

✓CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) The following ADF procedure is authorized for USAF use: Gray AFB, Killeen, Texas ADF procedure utilizing Gray homing bcn, freq: 221 kc, ident: HOD. Weather minimums as required by AFR 60-16. Initial apchs: 3000' from AUS rng, 51 mi, 345°; 3000' from SJT rng, 154 mi, 88°; 3000', 40 mi SW ACT rng, 26 mi, 287°. Final apch track 330° mag outbound, 150° mag inbound. Procedure turn W side of track. Min enroute alt: 3000' within 25 mi. Alt over Gray homer on final apch: 2000'. Mag bear. and dist from Gray homer to arpt: 150°, 3 mi. If visual ctc not established within 3 mi after passing Gray homer, climb to 3000' turn to heading of 270°, ctc Gray for further instructions. REMARKS: Min alt over fld: 1700' MSL.

(2) AL-222 dated March 20, 1951. Lake Charles AFB, La. Ctl twr now operational.

✓CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-81 dated January 28, 1951. Chicago Midway Arpt, Chicago, Ill. Effective immediately, the standard instrument apch procedure No. 2 has been cancelled. Request that this procedure be labelled "CANCELLED". Procedure No. 1 still authorized for use.

(2) AL-261 dtd Oct. 11, 1950. Millinocket, Me. Change SW crs of LF rdo rng from 40° to 88° mag and toward station.

(3) AL-39 dtd Feb. 27, 1951, Dow AFB, Bangor, Me. Change SW crs of LF rdo rng from [illegible]° to 72° mag and toward station.

(4) AL-28 dtd Feb. 5, 1951, Augusta (Daniel Field), Ga. Change initial apch alt to: W [illegible] 2300' from Atlanta Rng Stn. Change Procedure Turn to E side S crs, 1600' within 25 mi.

(5) AL-639 dtd Dec. 19, 1950. NAF Chincoteague, Va. Change initial apch alt to: N [illegible] minimum enroute altitude.

(7-31-51)

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised or hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no flights into or over foreign territory shall be made without prior authorization from the foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtin countries.

√ REPLACEMENT OF 111.1 MC BY 122.2 MC: Utilization of the frequency 111.1 mc for INSAC reply to private aircraft was authorized as an interim measure pending availability of other suitable reply channels. The primary assignment of 111.1 mc is for navigational aids and it is now required for that purpose. Effective August 1, 1951, therefore, the use of 111.1 mc for communications with private aircraft will be discontinued at all INSACS. The new national ground-to-air call-up and reply channel for communication with private aircraft, 122.2 mc, will be implemented at certain INSACS on August 1, 1951. Eventually, all INSACS will transmit on 122.2 mc but in the meantime pilots should consult the Airman's Guide and current NOTAMS for information on frequencies available at specific stations.

VHF OMNITEST SIGNAL FACILITIES: Experimental VHF omnitest signal facilities have been installed at the New York (LaGuardia 112.0 mc), Chicago (Midway 112.0 mc), and Kansas City (Municipal 113.0 mc) airports. These facilities cannot be used for navigational purposes but permit checking of aircraft navigational VOR receivers during a ramp test or while in flight near the airport. Voice communication is not available on the test signal frequency. The facility radiates a 0° course in all directions with a power output of about 10 watts. The identification consists of continuous dots without voice. Each facility is continuously monitored and will shut down automatically if the 0° course varies by more than one degree from normal or in case the identification fails. Flight checks indicate that the omnitest signal is usable to a distance of about ten miles at minimum instrument altitude although regions of weak and unreliable signal may be encountered at shorter distances. The omnitest signal may be regarded as dependable when there is no flag alarm showing or where no flag alarm is incorporated in the aircraft unit and the identification is received free from interference and noise. Comment from airmen will be appreciated. Please forward same to: Civil Aeronautics Administration, Washington 25, D. C., Attention: W-380.

RECEIVER OMNITEST PROCEDURE - Receivers with omni-bearing selectors (OBS)

Tune in omnitest frequency. The "To-From" indicator should read "To" or "From" and the alarm flag, if one is used, should disappear.

Set OBS in vicinity of 0° to center "Deviation" indicator. The "To-From" indicator should read "From" and the difference between 0° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

Set OBS in vicinity of 180° to again center "Deviation" indicator. The "To-From" indicator should read "To" and the difference between 180° and the actual OBS reading indicates the amount of calibration error in the Airborne equipment.

With the "Deviation" indicator centered in the 180° position rotate OBS clockwise until "Deviation" indicator reads full scale or five dots to left. Note OBS reading. Next rotate OBS counterclockwise until "Deviation" indicator reads full scale or five dots to right. Note OBS reading. The difference between the two OBS readings is a measure of receiver course sensitivity.

If instrumentation includes a radio magnetic indicator (RMI), the pointer on this instrument connected to the receiver being checked should be observed. This pointer should indicate 180° ± 1 degree regardless of the setting of the OBS.

AUTOMATIC INDICATING RECEIVERS: Automatic indicating receivers do not have an Omni-Bearing Selector or a "To-From" indicator and have no ambiguity. The only course that can be checked is the one indicated when the equipment is receiving the 0° (magnetic north) radial from the station, which is automatically indicated when the receiver is turned on and tuned to the correct signal frequency. Either 0° or 180° will be indicated depending on the sensing designed into the particular receiving equipment (as described in the instruction book for that equipment).

√ DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed:

Radio Call	Frequency
Albuquerque Center	120.3 mc
Atlanta Center	120.3 mc
Boston Center	120.3 mc
Chicago Center	120.3 mc
Cincinnati Center	120.3 mc
Cleveland Center	120.3 mc
Denver Center	120.3 mc
Detroit Center	118.9 mc
Ft. Worth Center	120.3 mc
Jacksonville Center	120.3 mc
Kansas City Center	120.3 mc
New York Center	118.9,120.7 mc
Oakland Center	120.3 mc
Pittsburgh Center	118.9 mc
St. Louis Center	118 9 mc
Salt Lake City Center	120.3 mc
San Antonio Center	120.3,137.88 mc
Seattle Center	120.3 mc
Washington Center	119.7,120.3,135.0,135.9,136.8,132.3, 137.88,121.5,126.18,142.38

AERONAUTICAL ADVISORY STATIONS (FREQUENCY 122.8 mc): This frequency is known in some areas as the "private flyers frequency" and also as "UNICOM". Licenses for ground stations and aircraft are now being issued by the FCC subsequent to receipt of application for license from private pilots and airport operators eligible to use the frequency. Under the FCC rules, private aircraft may use 122.8 mc for communication with aeronautical advisory stations and between private aircraft themselves while in flight. Particular attention is invited to Section 9.1001 which follows:

> "9.1001 Eligibility for station license. Authorization for aeronautical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station. Only one Aeronautical Advisory station will be authorized at a landing area."
>
> The scope of service to be rendered under FCC rules for the ground station is:
> "9.1004 Scope of service. (a) Communications shall be limited to the necessities of safe and expeditious operation of aircraft. The service shall be advisory in nature, pertaining to the condition of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations. (b) Aeronautical Advisory stations shall not be used for the control of aircraft."
>
> Airport operators interested in providing this service may obtain further details from the nearest FCC or CAA field office.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

ALASKA FLIGHT INFORMATION MANUAL: Because the last edition arrived so late from the printers, the issue scheduled for July 15 was not published. The next edition is scheduled for publication October 15, 1951.

✓NON-STANDARD HOLDING PATTERN: Effective immediately the following non-standard holding pattern is established: Holding point - FARGO, N. DAK. ILS outer marker; direction from holding point: S; direction of turn: LEFT on W side of S crs of lclzr; time: 2 minutes.

✓AIR ROUTE TRAFFIC CONTROL AND FLIGHT ADVISORY AREA BOUNDARY AMENDMENTS: Effective immediately the MIAMI-JACKSONVILLE and WASHINGTON-CINCINNATI Air Route Traffic Control and Flight Advisory Area Boundaries are amended as follows:

MIAMI-JACKSONVILLE: .....From 15 mi. N of Melbourne, Fla. on Amber 7, SW to 50 mi SE of Tampa, Fla. on Blue 75, thence to 50 mi. S of Tampa on Red 25; thence SW to a point at lat. 27-00N; long. 82-50W and along the 27th parallel to the Eastern boundary of the Miami West Oceanic Control Area.

WASHINGTON-CINCINNATI Air route traffic control area boundary is established 40 mi NW of Roanoke, Va. on Red 37.

✓INSTRUMENT APPROACH PROCEDURES: The standard instrument approach procedure No. 2, low frequency radio range, for Chicago, Ill., Chicago Midway Arpt has been CANCELLED, effective July 13, 1951. The VOR standard instrument approach procedures for the following airports have been CANCELLED, effective June 18, 1951: Key West, Fla., Meacham Fld; Jacksonville, Fla., Imeson Arpt.; Macon, Ga., Smart Arpt.

✓AERONAUTICAL CHART CORRECTIONS: Twin Cities sectional chart dated June 10, 1951 - Correct freq. of Minneapolis-St. Paul Intn'l tower from 138.42 mc to 119.5 mc.

✓CORRECTIONS TO AIRMAN'S GUIDE: Correct Airman's Guide Vol. 6, No. 8, dated July 2, 1951 as follows:

Page 80. Non-standard holding patterns: Delete "Time-2 minutes" from Washington ADF and Haines Point ADF holding patterns. Change Ft. Foote direction from holding point to South instead of West.

✓CORRECTION TO FLIGHT INFORMATION MANUAL: Correct Flight Information Manual Vol. 5, No. 2, dated June 15, 1951, as follows:

Page 64. Melbourne, Fla. Radio Stn WMMB. Frequency changed to 1240 kc; Hrs of opern: 0600-2315 daily.

✓DANGER AREA DESIGNATIONS: The following Danger Area amendments shall be effective as dated unless otherwise advised:

AMENDMENT NO. 79 (August 1, 1951)

(1) A Great Salt Lake, Utah temporary area is added to read: Location: GREAT SALT LAKE (Salt Lake City); Description: Beginning at lat. 41-10-00, long. 112-35-00; SE to lat. 41-06-30, long. 112-32-00; SSE to lat. 40-57-00, long. 112-30-45; due W to long. 112-30-45; due W to long. 112-50-00; due N to lat. 41-10-00; due E to lat. 41-10-00, long. 112-35-00, point of beginning; Altitudes: Surface to unlimited; Time: Continuous, August 1, 1951, through August 18, 1951; Using Agency: Hdqs., 15th Air Force.

AMENDMENT NO. 80 (August 10, 1951)

(1) The Tyndall Air Force Base, Fla. area published on May 26, 1950, in 15 F. R. 3212, is hereby designated "AREA I" and an AREA II is added to read: Location: TYNDALL AIR FORCE BASE (Mobile Chart); Description: AREA II: Beginning at lat. 31-10-20, long. 86-18-00; clockwise along the arc of a circle with a radius of 90 miles, centered at the Tyndall AFB radio range station at lat. 30-02-30, long. 85-32-15 to a point 3 nautical miles from the shoreline at lat 30-03-00, long. 84-02-00; westerly paralleling the shoreline at a distance of 3 nautical miles to lat. 29-36-30, long. 85-16-00; NW to the Tyndall AFB radio range station

at lat. 30-02-30, long. 85-32-15; NW to lat. 31-10-20, long. 86-18-00, point of beginning, excluding the overlapped portions of the Tyndall AFB Danger Area I and the Camp Rucker, Alabama Danger Area; Altitudes: 20,000 ft. to unlimited; Time: Sunset to sunrise; Using Agency: Dept. of Air Force, Tyndall AFB, Panama City, Fla.

(2) The Hinesville, Ga. area published on June 30, 1950, in 15 F. R. 4187, is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at the Ogeechee River at lat. 32-04-15, long. 81-22-30; southeasterly along the Ogeechee River to lat 32-00-30, long. 81-19-30; SSW to lat. 31-58-45, long. 81-19-45; SW to lat. 31-56-15, long. 81-23-00; SW to lat. 31-51-20, long. 81-36-00; WNW to lat. 31-55-30, long. 81-53-00; northerly to lat. 31-57-00, long. 81-53-15; NE to lat. 31-59-45, long. 81-51-06; NNE to lat. 32-04-40, long. 81-50-00; ENE to lat. 32-07-00, long. 81-43-30; easterly to lat. 32-06-15, long. 81-31-30; due S to lat. 32-05-30; ESE to lat. 32-04-15, long. 81-22-30, point of beginning.

(3) The Camp Hood, Texas area published on June 23, 1949, in 14 F. R. 3393 is revised to read: Location: CAMP HOOD (Austin Chart); Description: Beginning at lat. 31-22-30, long. 97-38-00; due S to lat. 31-08-00; due W to long. 97-50-00; due N to lat. 31-18-00; NE to lat. 31-22-30, long. 97-44-20; due E to lat. 31-22-30, long. 97-38-00, point of beginning; Altitudes: Surface to 45,000 ft; Time: Continuous; Using Agency: 8th Air Force

(4) A Gray Air Force Base, Camp Hood, Texas, area is added to read: Location: GRAY AIR FORCE BASE, Camp Hood (Austin Chart); Description: Beginning at lat. 31-18-00 long. 97-50-00; due S to lat. 31-08-00; due E to long. 97-45-00; due S to lat. 31-02-00; due E to long. 97-38-00; due S to lat. 30-56-00; due W to long. 98-00-00; due N to lat. 31-18-00; due E to lat. 31-18-00, long. 97-50-00, point of beginning; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: Gray AFB, Camp Hood, Texas.

AMENDMENT NO. 81 (August 13, 1951)

An Exercise Southern Pine, temporary area, over parts of North and South Carolina, is added to read: Location: EXERCISE Southern Pines (Charlotte Chart); Description: Within a 60 mile radius of lat. 35-03-00, long. 79-15-00, excluding the area overlapping Red Civil Airway No. 34; Altitudes: Surface to 30,000 ft.; Time: Continuous, August 13, 1951 through September 2, 1951; Using Agency: Hdqs., Maneuver Director, Ft. Bragg, N. Car.

(See Danger Area Chart on Back Page)

✓CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective 0001 EST August 10, 1951, unless otherwise advised, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red civil airway No. 16 (Tallashassee, Fla. to Florence, S. C.) is amended after the portion which reads "to the Macon, Ga. radio range station" by adding the following: "excluding the portion above 19,000 feet which lies within the Tyndall AFB danger area, between sunset and sunrise.

(2) Red civil airway No. 30 (Shreveport, La. to Jacksonville, Fla.) is amended by adding the following to present civil airways: "excluding the portion above 19,000 feet which lies within the Tyndall AFB danger area, between sunset and sunrise."

(3) Red civil airway No. 67 is amended to read: (Crestview, Fla. to Dothan, Ala.) From the Crestview, Fla. rdo rng stn to the Dothan, Ala. rdo rng stn, excluding the portion above 19,000 feet which lies within the Tyndall AFB danger area between sunset and sunrise.

(4) Blue civil airway No. 3 (Tallahassee, Fla. to Sault Ste. Marie, Mich.) is amended after the portion which reads: "excluding that portion which lies more than 2 miles west of the NW crs of the Dothan, Ala. rdo rng between lat. 31-20-00, long. 85-34-00 and lat. 31-34-00, long. 85-42-00" by ADDING the following: "and excluding the portion above 19,000 feet which lies within the Tyndall AFB danger area, between sunset and sunrise;"

CONTROL AREAS: (1) Red civil airway No. 16 control area (Tallahassee, Fla. to Florence, S. C.) is amended after the portion which reads "from the Tallahassee, Fla. omni rng stn to the Albany, Ga. omnirng stn via the direct enroute and 15° W alt change radials" by adding the following "excluding the portion above 19,000 feet which lies within the Tyndall AFB danger area, between sunset and sunrise".

(2) Red civil airway No. 25 control area (Tallahassee, Fla. to Miami, Fla.) is amended after the portion which reads "from the Tallahassee, Fla. omnirng stn to the Cross City, Fla. omnirng stn via the direct enroute and 15° SW alt change radials" by adding the following "excluding the portion above 19,000 feet which lies within the Tyndall AFB danger area, between sunset and sunrise".

(3) Red civil airway No. 30 control area (Shreveport, La. to Jacksonville, Fla.) is amended by adding the following to present control areas: "excluding the portion above 19,000 feet which lies within the Tyndall AFB danger area, between sunset and sunrise".

(4) Blue civil airway No. 3 control area (Tallahassee, Fla. to Sault Ste Marie, Mich.) is amended by changing the first portion to read: "All of Blue civil airway No. 3 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Muscle Shoals, Ala. omnirng stn to the Graham, Tenn. omnirng stn via the direct enroute and 15° W alt change radials, including all that area bounded on the N by Green civil airway No. 5, on the E by Blue civil airway No. 3 and on the W by the Muscle Shoals-Graham direct enroute radials, excluding the portion above 19,000 ft. which lies within the Tyndall AFB danger area, between sunset and sunrise."

CONTROL AREA EXTENSIONS: Control area extension (Tallahassee, Fla.) is amended by adding the following to present control area extension: "Excluding the portion above 19,000 ft. which lies within the Tyndall AFB danger area, between sunset and sunrise."

(2) Control area extension (Tampa, Fla.) is amended to read: All that area along a straight line between the Tampa, Fla. rdo rng stn and the Tyndall AFB, Fla. rdo rng stn, extending 5 miles either side of the line at the rdo rng stns thence diverging to 10 miles either side of the line at a point halfway between the rdo rng stns, excluding the portion which lies within the Tyndall AFB danger area (Area I), excluding the portion above 19,000 ft. which lies within the Tyndall AFB danger area (Area II), between sunset and sunrise and excluding the portion below 2,000 ft. which lies outside the continental limits of the United States."

(3) Control area extension (Dothan, Ala.) is amended by adding the following to present control area extension: "excluding the portion above 19,000 ft. which lies within the Tyndall AFB danger area, between sunset and sunrise."

CONTROL ZONES: (1) Dothan, Ala. control zone is amended by adding the following to present control zone: "excluding the portion above 19,000 ft. which lies within the Tyndall AFB danger area, between sunset and sunrise."

(2) Tallahassee, Fla. control zone is amended by adding the following to present control zone: "excluding the portion above 19,000 ft. which lies within the Tyndall AFB danger area, between sunset and sunrise.

REPORTING POINTS: Blue civil airway No. 39 (Knoxville, Tenn. to U. S. Canadian Border) is amended to read: The intsxn of the SE crs of the Pittsburgh, Pa. rdo rng and the NE crs of the Morgantown, W. Va rdo rng.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (7-25)
ANNISTON-RADIO: Omnirng gnd-checked only. (4-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (7-16)
BIRMINGHAM-RADIO: June 25, omnirng shut down until approx Sept 22 - relctn.
★BIRMINGHAM ARPT-TOWER: CAA ILS glide path angle adjusted to 2°45'. Path now intercepts OM at 2000' MSL. (7-27) FLD: 2-way rdo rqrd ngts, rcvr days. (5-23) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
EVERGREEN-RADIO: Omnirng operg test-basis, gnd-checked only, awaiting flgt-check. (7-20)
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn. (5-10)

ALABAMA: MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20) Rnwy 5-23 clsd (const). (5-7)
★MONTGOMERY-RADIO: Bear., dist VOR to Dannelly Fld: 316 °, 6.1 mi. (7-19) A maximum of one half degree in excess of allowable error will be found in E sector omnirng between radials 90° and 118°. (6-14)
ARIZONA: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (4-2)
••DOUGLAS MUN ARPT: Correct lat 31-20-30, long. 109-30-15. (5-18)
LUKE AFB (PHOENIX): Ctn - exten const all rnwys. (2-19) Rnwy 3-21 clsd (const). (5-2)
PHOENIX-SKY HARBOR ARPT: Taxiway and portion of airline ramp N of Rnwy 8L-26R clsd. Rnwy 8L-26R clsd xcpt for taxying. Use Rnwys 3-21 and 8R-26L only. (7-2)
★TUCSON-RADIO: LF rng auto. crs monitor. device decommd. (7-30)
ARKANSAS: BENTON ARPT: W half N/S Strip clsd (const). (6-12)
••BENTONVILLE ARPT: 51' bcn twr erected E side adj to N end of hangar. (7-23)
BRINKLEY-FEDERER MEMORIAL ARPT, SITE 37, DAL-LOU: Clsd ngts. Rows of dirt on SW end NE/SW Strip, use emerg only. (5-17)
••FAYETTEVILLE ARPT: 75' bcn twr erected NW corner between hangar and hwy. (7-23)
FLIPPIN-RADIO: About Aug. 6, omnirng will be shut down until approx Oct 29 - modernization. (7-14)
FT. SMITH ARPT: Equip. on W end E/W Rnwy. (7-24)
LITTLE ROCK-ADAMS FLD-TOWER: Transmission and reception poor on all VHF freqs S to W account obstns near temp twr until approx Oct. 1. Apch ctl on rng freq 353 kc not avail until approx Oct. 1. (7-30) FLD: Ctn lndg N or NE, vision of ctl twr partially obstd. (5-14) Lmtd NG svcg. (10-24)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
CALIFORNIA: BAKERSFIELD-RADIO: Omnirng has slight to moderate scalloping in SE quad 80° to 123°.
••BOREGO HOTEL OLF (SALTON SEA): Correct lat. 33-05-30, long. 116-06-15. (7-17)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft xcpt on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. MT. VERNON OLF: Clsd to all acft except those permitted by the C.O., Whidbey Island NAS. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (2-21)
SEATTLE-RADIO: Soon Lakeview FM on S course will be discontd. (7-19)
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. (7-26)
SEATTLE NAS: Acft in tfc are rstd from figt over the area W of centerline Rnwy 14-32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (2-21)
SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: Lclzr and glide path shut down-rnwy const. (6-6) FLD: Ctn-Rnwy 16 under const. Threshold lgts removed from N end Rnwy 16. 3 green lgts spaced 20' intervals each side rnwy, 100' S of N end. Equip on fld. (4-4)
SHELTON-RADIO: LF rng on 362 kc has limited usable crs dist as follows: S crs 35 mi, SW and N 30 mi each. (1-5)
WASHINGTON: SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with wind cone S side of fld. When wind cone points 90° to rnwy, take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (10-9)
SPOKANE-GEIGER FLD-TOWER: Interference on LMM freq 201 kc. (12-21) Back Course narrow with unflyable bends. (2-26) FLD: Ctn const both sides Rnwy 2-20. Open ditch W side ramp, mrkd. Ctn taxying at intsxns. Equip on fld. Open ditch rgt side Rnwy 2 from end to midway point and across rnwy. (7-17)
WHIDBEY ISLAND NAS: Rnwys at Ault Fld are black asphaltic concrete and have a capacity of 25,000 lbs per wheel if tire pressure is under 85 lbs; or 35,000 lbs if tire pressure is over 85 lbs. (2-21)
WEST VIRGINIA: CHARLESTON-KANAWHA CO. ARPT: Tfc on SW and SE ends of loading ramp and NG hangar area not ctld by twr. Equip. SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd. (5-21)
MARTINSBURG-RADIO: Omnirng gnd checked only. (4-6)
MORGANTOWN-RADIO: LF rng figt-checked, crss correctly aligned. Multiples and fades all crss. June 18, omnirng shut down until approx Sept 14 - relctn.
PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough.
TAPLIN-McDONALD ARPT: 201' lgtd twr erected 17 mi SW (235°T) at lat 37-37-02, long. 82-10-04. (7-7)
WHEELING-RADIO: Soon CAA ILS LOM freq 275 kc will be changed to 293 kc; ident HL and LMM freq will be 275 kc; ident LG. (7-2)
WHEELING-OHIO CO. ARPT: Turf area clsd. Equip on fld days. Use rnwys, taxiways only. (5-18)
WISCONSIN: CAMP McCOY ARPT: Use N/S Rnwy with rgt hand tfc to S and left hand tfc to N to avoid artillery firing. (7-2)
DRUMMOND-SORENSEN ARPT: Clsd ngts. N/S Strip under const. (5-15)
HALES CORNERS ARPT: NW/SE and NE/SW Strips clsd. (7-18)
LA CROSSE-RADIO: Omnirng radials between 314° and 331° unreliable 20 to 30 mi from rng.
MADISON ARPT: Open ditches apch end Rnwys 4 and 36. SW Taxiway clsd 0700-1800 daily and barricaded at E end. Equip. on fld days. Sod unsafe. Due to non-visibility twr unable to ctl tfc on SE ramp. (7-4)
MANITOWOC ARPT: NE/SW and NW/SE Strips clsd (const). (7-20)
★ MILWAUKEE-RADIO: Kenosha FM on S crs relctd to lat 42-33-08, long. 87-53-36. Awaiting figt check. (7-25)
MILWAUKEE-CURTIS-WRIGHT ARPT: E/W and NE/SW Strips on E side segmented circle clsd. (7-16)
MILWAUKEE-GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 18-36, 2300' long open to lgt acft days only. (7-20)
PALMYRA ARPT: Clsd (const). (7-16)
PORTAGE-MAEL ARPT: NE/SW Strip clsd. (7-26)
WYOMING: CASPER-RADIO: Omnirng radials between 10° and 35° from stn unusable at min. inst alt. beyond 35 mi.
DOUGLAS-RADIO: Omnirng figt-checked opern normal. (7-28)
FORT BRIDGER-RADIO: July 12, omnirng shut down until approx Aug 11 - modernization. (7-19)
KEMMERER ARPT: 14 - 20" grass on all rnwys. (7-6)
LANDER ARPT: Ctn - const. Use NNE/SSW Strip only. (6-14)
NEW CASTLE-MONDELL ARPT: New NW/SE Strip under const. Equip on fld days. Lnd at own risk. (5-14)
ROCKRIVER- RADIO: July 23, omnirng shut down until approx Sept 21 - modernization. (7-24)
ROCK SPRINGS-RADIO: July 5, omnirng shut down until approx Sept 9 - modernization.
WHEATLAND ARPT, SITE 6, CYS-GTF: About Aug 1, fld will be discontd. (7-2)
WHEATLAND, BCN SITE 6, CYS-GTF: About Aug 1, site will be discontd. (7-2)

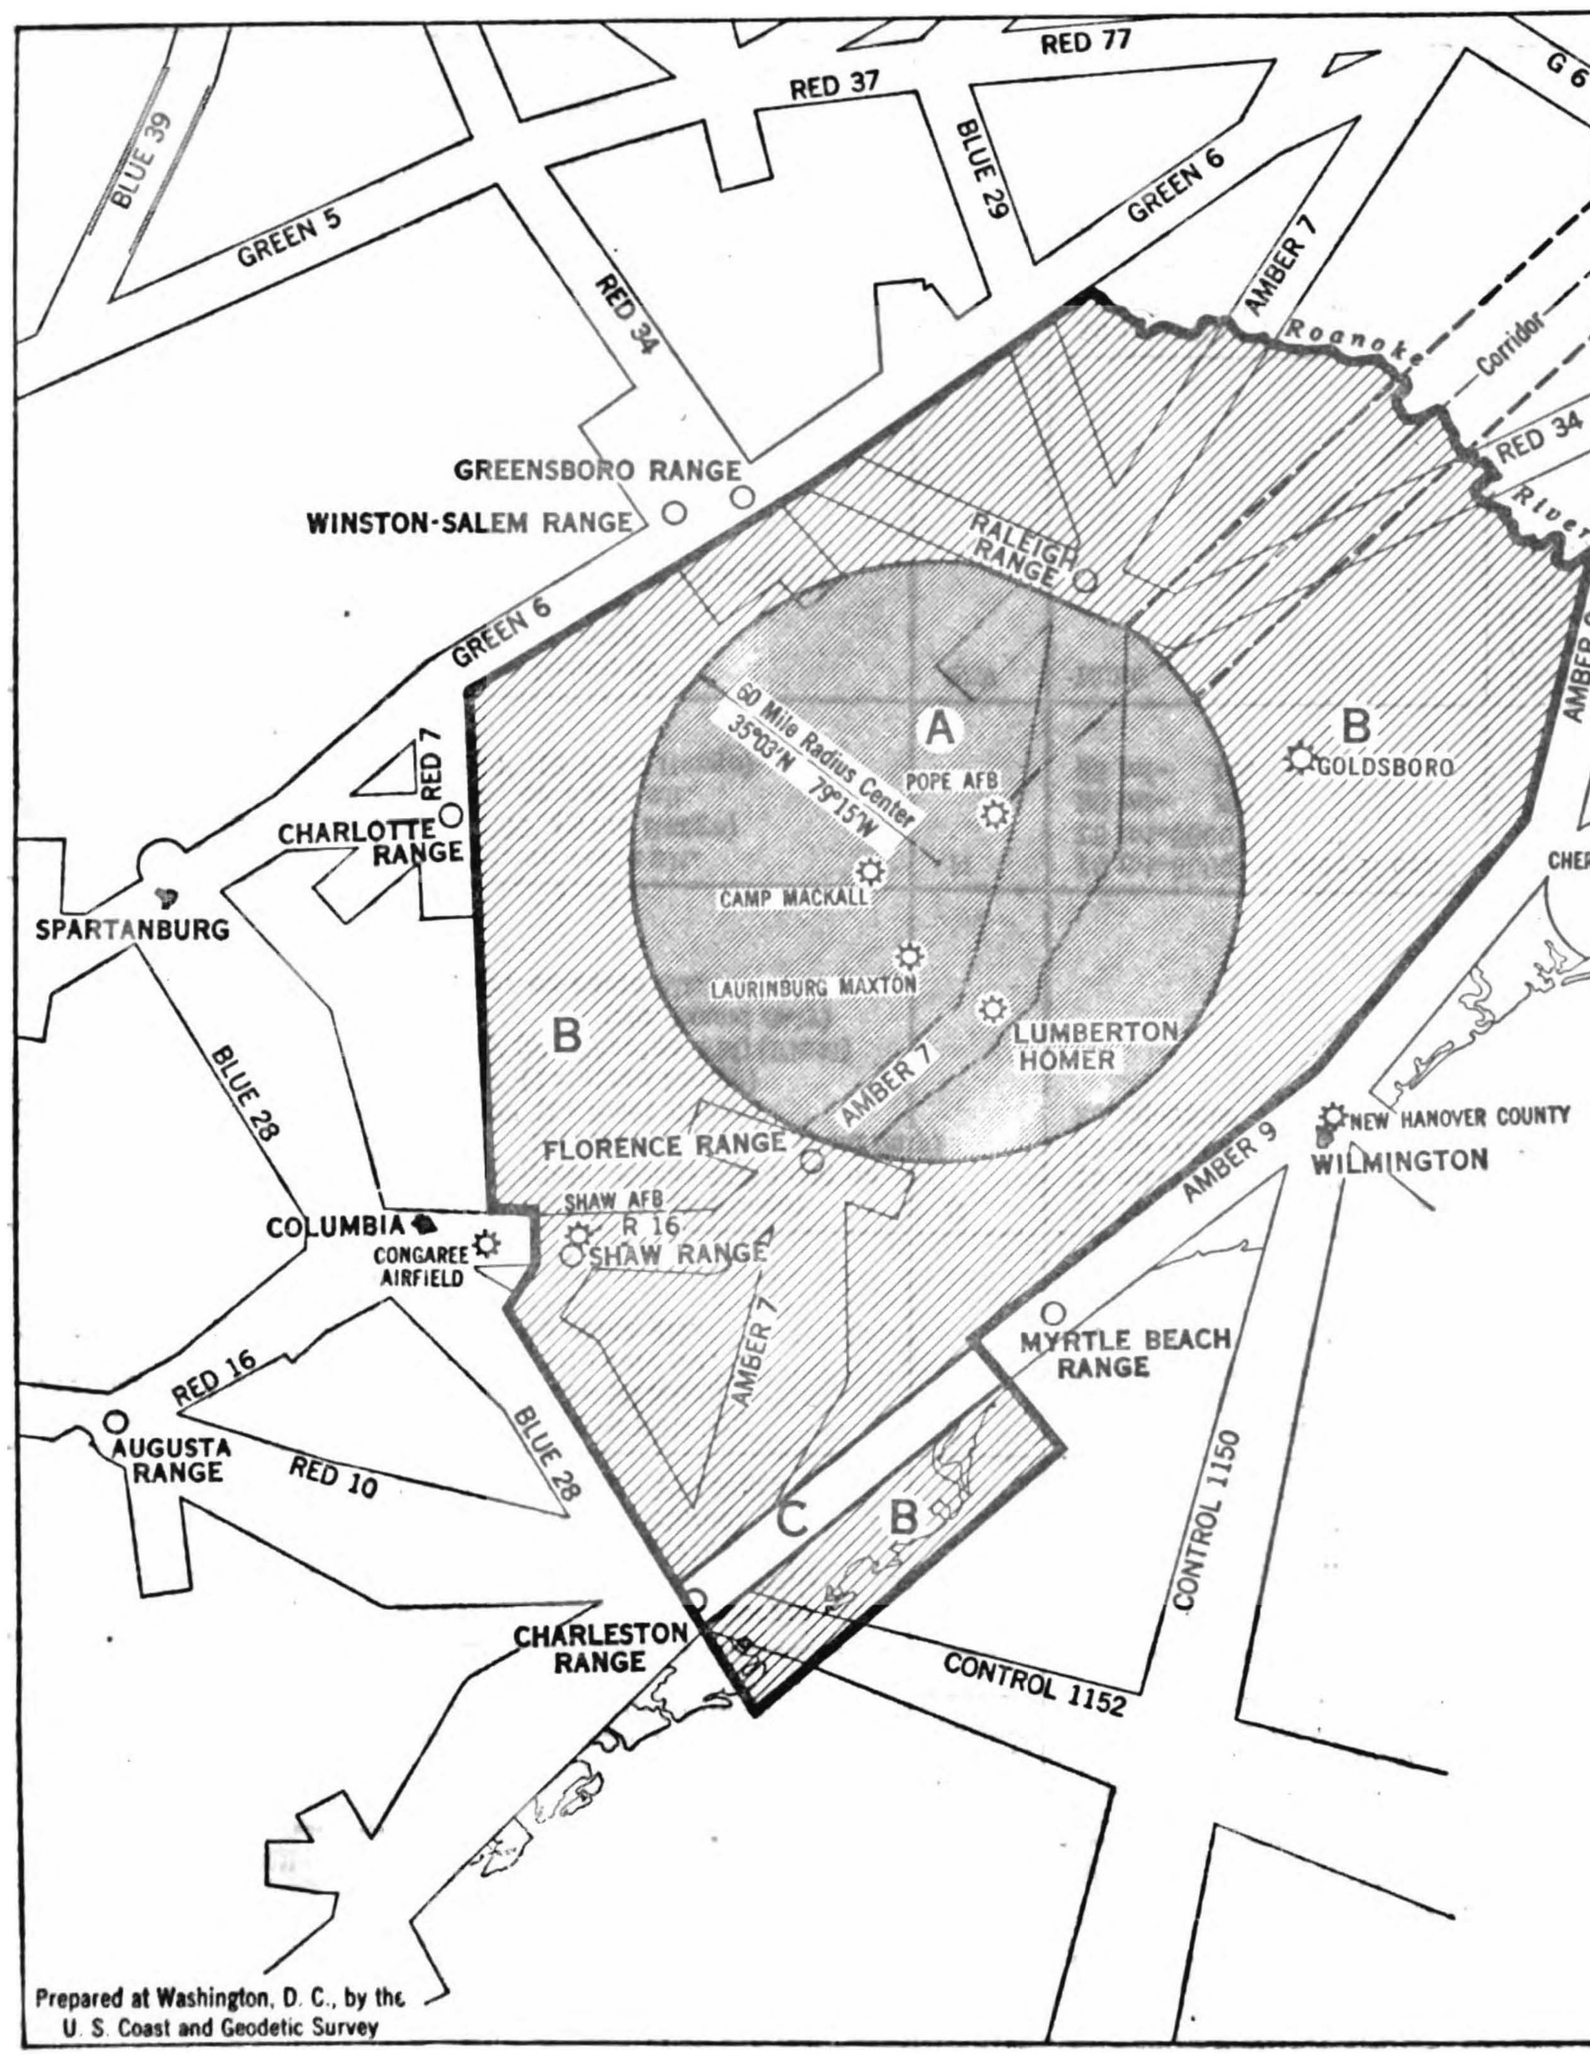
SPECIAL DANGER CHART
USAF CAROLINA MANEUVERS

"Exercise Southern Pine": Effective from 13 August 1951 to 2 September 1951, inclusive, the United States Air Force will conduct intensive maneuvers in the Raleigh, N. C., Charleston, S. C. Area. These maneuvers will involve the flight of a large number of aircraft operating during both VFR and IFR weather conditions within the areas shown, which have been set aside for the use of maneuver aircraft. Flight of non-maneuver aircraft within the areas will be permitted as indicated by the Legend.



Prepared at Washington, D. C., by the U. S. Coast and Geodetic Survey

LEGEND

Non-Maneuver Military Aircraft	Civil Aircraft
Area A	
VFR Authorized flights only. These flights must enter on Amber Civil Airway No 7 with clearance from Air Maneuver Area Control.	VFR Only previously authorized flights (Piedmont Airlines and certain private operators within area) in accordance with AF/ civil agreement.
IFR Authorized flights only. These flights restricted to Amber Civil Airway No 7 with ATC clearance in accordance with Civil Air Regulations.	IFR All flights restricted to Amber Civil Airway No 7 with ATC clearance in accordance with Civil Air Regulations.
Area B	
VFR Authorized flights only.	VFR No restrictions; however, extreme caution should be observed.
IFR Authorized flights only. These flights restricted to civil airways with ATC clearance in accordance with Civil Air Regulations.	IFR All flights restricted to civil airways, except direct flights between Raleigh, Goldsboro and Cherry Point, N.C. All flights with ATC clearance in accordance with Civil Air Regulations.
Area C	
VFR No restrictions. Observe caution.	VFR No restrictions. Observe caution.
IFR No restrictions. Civil Air Regulations apply.	IFR No restrictions. Civil Air Regulations apply.

The Controlling Agency is "AIR MANEUVER AREA CONTROL", Pope AFB North Carolina

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC. and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z. . . . VHF station location marker at a range station.

FREQUENCY LEGEND

V = 135.9 and 135.0 mc transmitted.
# = Guards same VHF frequencies station transmits except 122.2 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic inbearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (5-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(8-14-51)

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.
(D) = Day. (N) = Night. → = New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	C	-Commercial	MG	-Misc. Govt
A	-Army (May also be used by Army Nat'l Guard)	CG	-Coast Guard	N	-Navy
		I	-Intermediate	NG	-Air Nat'l Guard
		M	-Municipal	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant

FUEL OCTANE (cont).

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, USAF Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters USAF ACIS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields"

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:
Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

√CHANGE IN VHF CHANNELIZATION: Effective September 1, 1951, VHF/DF service on 137.88 mc will be discontd and service conducted on 137.88 mc (Channel C). VHF/DF on freq. 173.88 mc will be on secondary basis for use of frequency by Military Airways; and for GCA by 4-channel equipped aircraft.

√UHF CHANNELIZATION: An initial UHF channelization plan has been approved for USAF and USN UHF-equipped aircraft in the U. S. and will be published in subsequent issues of the Radio Facility Charts. UHF frequencies which are being first implemented at USAF stations on a continuing program beginning 1 July 1951 are:

Channel 1	Control tower (military primary)	236.6 mc
" 15	Military Airways	258.20 mc
" 17	GCA	335.80 mc
" 18	GCA	289.40 mc
Guard	Military emergency	243.00 mc

It is contemplated that CAA stations, towers and centers will provide service on UHF. The channels to be used and the date that the services are to be available will be published later

---

√CHANGES FOR USAF PILOT'S HANDBOOK, JET U. S.: The following ADF Jet Penetration procedure is authorized for USAF use: Alexandria AFB, La. ADF procedure. Primary Fix: Alexandria Rng, ident. AEX. Freq. 251 kc. Letdown clearance obtained thru Alexandria Ctl Twr 126.18 mc, B channel prior to arrival over AEX rng. Weather Minima: 1500', 2 mi day, 2000', 3 mi ngt. Initial penetration alt: 15,000' or 500' on top, whichever is lower. Descent from 500' on top to 15,000' will not be made without prior approval of ATC unless made VFR. Outbound penetration track 190° mag. One minute after crossing AEX rng begin letdown to 10,000'. Penetration turn: level turn to the left 35 mi out. Inbound penetration track: 360° mag to AEX rng, letdown to 2,000'. Report to AEX twr when VFR or upon reaching 2000'. Distance and direction AEX rng stn to aerodrome: 310° mag, 5.7 mi. Missed apch: if not VFR at 2,000' after passing AEX rng stn, climb on 360° mag heading to assigned alt or 500' on top. Advise Alexandria Twr of missed apch.

(8-14-51)

✓CHANGES FOR PILOT'S HANDBOOD (EAST) U. S.: (1) AL-661, dtd Apr. 26, 1951. Wilkes Barre, Pa. N crs LF rdo rng realigned to 173° mag and toward stn.

(2) AL-457, dtd Mar. 9, 1951. Williamsport, Pa. N crs LF rng realigned to 176° mag and toward stn; all quadrants reversed.

(3) AL-10, dtd Oct. 30, 1950. Albany, N. Y. W crs LF rdo rng realigned to 113° mag and toward stn.

(4) AL-411, dtd Dec. 21, 1950. Hancock Arpt, Syracuse, N. Y. E and S crs LF rdo rng realigned to 290 and 05° mag and toward stn.

✓CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: The following low frequency rng procedure is authorized for USAF use: Bryan AFB, Texas. LF procedure utilizing Bryan rdo rng, freq. 212 kc, ident. BYT. Weather minimums: 500-1 day, 500-2 ngt. Initial apch: NE crs; Minimum earoute alt: SE crs 1600' from Houston Rng, SW crs 1600' from SE crs Austin Rng. NW crs 2000' from Waco Rng. Final apch: NW crs. Procedure turn W side of NW crs, 1500' within 25 mi. Alt over BYT rng on final apch: 800'. Mag bear. and dist. from BYT rng to arpt: 117°, 4.5 mi. If visual ctc not established within 4.5 mi after passing BYT rng, climb to 1600' on SE crs.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no flights into or over foreign territory shall be made without prior authorization from foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtin countries.

✓DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The locations at which this direct communications procedure is available are listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing.

✓VERY HIGH FREQUENCIES FOR PRIVATE PILOTS: Use of very high frequency channels by the majority of private pilots has heretofore been limited to the channels 121.5, 122.1,122.5 and 122.8 mc. Now, however, any private pilot having need for additional channels may apply to the FCC for use of any of the 40 channels in the 118.1 to 126.7 mc band. To determine their additional requirements, pilots should consult the Airman's Guide (Radio Facilities Section) or contact the nearest CAA regional office for information concerning the channels which have been implemented at the various locations. Of particular interest may be the channel 126.7 mc which was previously limited to use by air carriers for communication with CAA stations (INSACS) but now may be used by any private pilot if required for that purpose.

✓DISCONTINUANCE OF 111.1 MC: Utilization of the frequency 111.1 mc for INSAC reply to private aircraft was authorized as an interim measure pending availability of other suitable reply channels. The primary assignment of 111.1 mc is for navigational aids and it is now required for that purpose. Effective August 1, 1951, therefore, the use of 111.1 mc for communication with private aircraft was discontinued at all INSACS. The new national ground-to-air call-up and reply channel for communication with private aircraft, 122.2 mc, was implemented at certain INSACS on August 1, 1951. Eventually, all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current NOTAMS for information on frequencies available at specific stations.

DVFR FLIGHT PLANS: When an IFR flight plan is canceled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AERONAUTICAL ADVISORY STATIONS (FREQUENCY 122.8 mc): This frequency is known in some areas as the "private flyers frequency" and also as "UNICOM". Licenses for ground stations and aircraft are now being issued by the FCC subsequent to receipt of application for license from private pilots and airport operators eligible to use the frequency. Under the FCC rules, private aircraft may use 122.8 mc for communication with aeronautical advisory stations and between private aircraft themselves while in flight. Particular attention is invited to Section 9.1001 which follows:

"9.1001 Eligibility for station license. Authorizations for aeronautical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station. Only one Aeronautical Advisory station will be authorized at a landing area!"

The scope of service to be rendered under FCC rules for the ground station is:
"9.1004 Scope of service. (a) Communications shall be limited to the necessities of safe and expeditious operation of aircraft. The service shall be advisory in nature, pertaining to the condition of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations. (b) Aeronautical Advisory stations shall not be used for the control of aircraft."

The following locations have been reported as having Aeronautical Advisory Service Available:

Muncie Arpt, Ind. (daytime hours)
Davenport Arpt, Iowa (0730-2000)
Revere Arpt, Mass. (0900-Sunset)
Flat Rock-Nan-Bar Arpt, Mich. (0800-sunset and hrs prior req.)
McAllen Arpt, Texas (0800-1900)
Concord Arpt, N. H. (daylight hours)
Keene-Dillant-Hopkins Arpt, N. H. (daylight hours)
Laconia Arpt, N. H. (daylight hours)
Lebanon Arpt, N. H. (daylight hours)

Airport operators interested in providing this service may obtain further details from the nearest FCC or CAA field office.

ALASKA FLIGHT INFORMATION MANUAL: Because the last edition arrived so late from the printers the issue scheduled for July 15, was not published. The next edition is scheduled for publication October 15, 1951.

DANGER AREA DESIGNATIONS: The following Danger Area amendments shall be effective as dated unless otherwise advised:

(AMENDMENT NO. 82 (August 31, 1951)

(1) The Yuma, Arizona, area published on May 17, 1951, in 16 F. R. 4607, is amended by changing the "Using Agency" column to read: "Air Training Command, Luke AFB, Phoenix, Arizona and Air Defense Command, Yuma County Airport, Yuma, Arizona.

(2) A Boullion Mountains, California area is added to read: Location: BOULLION MOUNTAIN (Los Angeles Chart); Description: Beginning at lat. 34-41-00, long. 116-03-00; SE to lat. 34-35-30, long. 115-58-00; ESE to lat. 34-33-00, long. 115-47-00; S to lat 34-25-00, long. 115-47-00; E to lat. 34-25-00, long. 115-44-00; S to lat 34-14-00, long. 115-44-00; W to lat. 34-14-00, long. 116-17-00; NW to lat. 34-43-00, long. 116-34-30; E to lat. 34-43-00 long. 116-17-00; ESE to lat. 34-41-00, long. 116-03-00, point of beginning; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: Commandant, Eleventh Naval District, San Diego, Calif.

(3) The Eureka, Washington area published on July 19, 1951 in 16 F. R. 6915 is deleted.

NON-STANDARD HOLDING PATTERN: Effective immediately the following non-standard holding pattern is established: Holding point - Eugene, Oreg. ILS outer mrkr; direction from holding point - N; Direction of turn: LEFT on E side of N crs lclzr; Time: 2 minutes, minimum altitude: 3000'.

CORRECTIONS TO AIRMAN'S GUIDE: Correct Airman's Guide, Vol. 6, No. 10, dated July 31, 1951, as follows:

Page 81: Correct amendments to civil airways, control areas, control area extensions, and control zones by changing the portions which read, "excluding the portion above 19,000' which lies within the Tyndall AFB danger area, between sunset and sunrise" to read: "excluding the portion above 19,000' which lies within the Tyndall AFB danger area (Area II) between sunset and sunrise.

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. 5, No. 2 dated June 15, 1951, as follows:

(1) Page 10. Delete Effingham, Ill. CAA INSAC and ADD Vandalia, Ill. CAA 478.

(2) Page 11. Change Bowling Green, Ky. CAA number to 4424. Topeka, Kansas CAA number to 2-5478. Change Detroit, Wayne-Major, Mich. WB number to LO-2-2250. Change Duluth, Minn. CAA number to 2-7326. Delete Willmar, Minn.

(3) Page 12. Add Lexington, Neb. CAA number: 61. Change Whitehall, Mont. CAA number to 189.

(4) Page 13. Change Grand Forks, N. Dak. CAA number to 2-3291. Change Zanesville, Ohio CAA number to 2-8611. Delete: Pembina, N. Dak.; East Liverpool, Ohio; Perry, Ohio.

(5) Page 14. Change Blackstone, Va. CAA number to 406. Delete Bryan, Texas and add College Station, Texas CAA number 4-1184.

(6) Page 15. Change La Crosse, Wisc. WB number to 2-4533, CAA number to 3-0232.

(7) Page 70. Change height of rdo stn tower at New Bern, N. C. "WHIT" to 152'.

(8) Page 200. Under VHF Omnirange (VOR) Procedures, Santa Fe, N. M. under Initial Approach to VOR Station, line one should read: "Las Vegas VOR" instead of "Santa Fe VOR".

AIR TRAFFIC CLEARANCES: The initial traffic clearance issued to an aircraft prior to departure will normally authorize flight to the point of first intended landing, with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request any desired altitude changes en route. Better service can be given the pilot if any altitude change is requested at the time the change is desired. An amendment to the initial clearance may be issued to a flight at any time an air traffic controller deems such action necessary to avoid possible confliction between enroute, landing, or departing aircraft. A flight is always cleared to a specific point or location (radio or visual reporting point), defined as a clearance limit. If the assigned altitude is below the minimum for a subsequent portion of the flight and radio failure is experienced, the procedures outlined under TWO-WAY RADIO FAILURE must be followed to insure proper terrain clearance.

Whenever an aircraft has been cleared to a point other than the destination airport it is the responsibility of Air Traffic Control to issue whatever further clearance is appropriate at least five minutes before the aircraft arrives at the clearance limit, unless holding instructions and a time at which the pilot may expect further clearance have been received and acknowledged by the pilot. In the event a pilot arrives at a clearance limit without having received either a clearance beyond or holding instructions at such fix, he should immediately request further clearance and hold at the clearance limit, maintaining the last assigned altitude, until further clearance is received. When a clearance limit is a point other than the destination airport, the altitude of the aircraft at this clearance limit will be protected so that separation will exist in the event the aircraft must hold awaiting further clearance. Note: The foregoing should not be construed as being related in any way to the procedures which apply when a two-way radio failure occurs.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

(8-14-51)

CONNECTICUT: E. HARTFORD-RENTSCHLER ARPT: VFR flgt test operns davs all alts in 75 mi radius. (1-4) 80' crane 500' NW apch end Rnwy 4 days. (5-14)

NEW HAVEN ARPT: Taxi strip from Admin Bldg to N end Rnwy 1-19 clsd. Const N end Rnwy 1-19. (6-15)

WINDSOR LOCKS-BRADLEY FLD: 80' lgtd Admin Bldg under const S end. (6-23)

DELAWARE: DOVER-SUNGLO FLD: Hwy const adj to the W. (7-10)

DOVER AFB-RADIO: USAF rng gnd-checked only. Reliable for homing only. (7-19)

FORT MILES: Overwater Controlled Firing Area in vcnty formerly approved on a seasonal basis, is now rqrd on a yearly basis. Area is described as follows: Beginning at lat 38-45-30, long. 75-01-24; SE to lat 38-43-00, long. 74-57-10; SSE to lat 38-38-50, long. 74-55-33; W to lat 38-37-54, long. 75-03-50; northerly along the shoreline at lat 38-40-45, long. 75-04-09; NE to point of beginning. Time of Use: May to Oct 1300-1900, Nov to Dec 0800-1730. Activities: Anti-acft firing. Controlling Agency: 2nd Army, Ft. Miles, Dela. Effective Date: Jan 5, 1951.

WILMINGTON-RADIO: Z mrkr shut down - maintenance. (6-27)

WILMINGTON-NEW CASTLE CO. ARPT: Jets and other mil acft operg daily. Two 465' unlgtd bridge twrs erected across Delaware Riv 4 mi ENE. (7-16)

DIST. OF COLUMBIA: DISTRICT OF COLUMBIA-SPECIAL NOTICE: Attention must again be brought to pilots operating in the Washington National Airport Area regarding close adherence to the established traffic patterns. The CAA is receiving an alarming increased number of complaints regarding "Noise Nuisance" from communities in the vicinity, especially from Alexandria. It is felt that some of these complaints are justified in view of the many reports of low flying from communities some distance from the airport. The Administrator of Civil Aeronautics is desirous of having all pilots use the maximum permissable altitudes rather than the 1200' minimum in the proper pattern procedures on approaching Washington National Airport.

The current traffic patterns are again published on pages 94, 95 and 96.

ANACOSTIA NAS-RADIO: Navy VHF/DF inop - repairs. (4-30)

ANACOSTIA NAS-TOWER: July 16 navy twr inop until approx Aug 27 - modernization. Acft contact Bolling twr on Bolling freqs for lndg and take-off instructions at NAS Anacostia. (7-13) FLD: All pilots clearing to Anacostia NAS under IFR should be thoroughly familiar with all Washington area rdo and communs facs, the reporting points, all holding pats, and let down procedures, inclg "TIMED APCHS". (11-1)

BOLLING AFB: Lmtd trans quarters. (7-12)

WASHINGTON-SPECIAL NOTICE: CAA regards Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac River. Acft remain clear of U. S. Naval Medical Center, Bethesda, Md., lat 39-00-30, long. 77-05-30. Beginning June 11, avoid low flying over Watergate area lctd adj Memorial Bridge and 6 mi N of Washington Nat'l Arpt-concert.

WASHINGTON NATIONAL ARPT: USAF, NAVY, CG: Clsd to all acft except: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. (b) Scheduled MATS. (c) Flgts rqrg customs and immigration service. (d) Logistic support flgts. (CG logistic flgts not hangared at WNA rqr prior approval of arpt director, must be cleared with Comdt., C.G., and will be flown VFR conditions only). (e) CG acft hangared at WNA. (f) USAF acft assigned to WNA. NO acft over 120,000 lbs. without prior approval arpt director. CG acft taxi to CG Hangar #6 S of Admin. Bldg. Navy acft taxi to MATS terminal N of Admin. Bldg. GENERAL: Fighter type acft (both civil and mil) prohibited. 2-way rdo rqrd. Use paved areas, shoulders soft. Equip on fld. Wea. Bur. exper observations approx 50' S of apch end Rnwy 36 when ceiling 600' or less and/or visibility 1.5 mi or less with ceiling balloons daylgt and ceiling lgt darkness. Standard timed apch procedures inaugurated utilizing current holding procedures. (12-15) Top level obst lgt on 510' twr Rdo Stn WHMB 15 mi N inop. (1-15) Ctn-when turning onto taxiways or rnwys. (3-15) A search lgt of moderate intensity for measuring cloud ceiling will oper intermittently day and ngt from ILS MM site on apch to Rnwy 36, approx 3500' from arpt bndry. The beam of lgt rotates approx 2-1/2 rpm in a vertical plane. It is partially shielded and generally will not be visible to pilots making an apch to Rnwy 36. Occasionally it may be seen as a single brief, relatively low intensity flash when viewed from certain positions in vcnty of MM. The lgt has no navigational, tfc ctl, or warning significance. (5-4)

ROCK SPRINGS-RADIO: July 5, omnirng shut down until approx Sept 9 - modernization.
**WHEATLAND, BCN SITE 6, CYS-GTF: Aug 1, site discontd.

AIRPORT TRAFFIC PATTERNS

WASHINGTON NATIONAL - BOLLING AFB - ANACOSTIA NAS

Washington National Airport

Patterns are designed for use in accordance with Visual Flight Rules. These patterns are to be followed by all aircraft, except when specific clearance is obtained from the Washington Tower for deviations therefrom. The Tower shall have complete authority to authorize deviations necessary to separate and expedite air traffic.

Minimum pattern altitude shall be 1200 feet MSL , but additional levels may be assigned by the Washington Tower, when necessary.

All VFR traffic arriving or departing Washington National Airport, while in the vicinity of Washington, shall normally remain west of the Potomac River unless otherwise cleared by the Washington Tower.

Standard traffic patterns for Runways 3, 33, 36 shall be rectangular with all turns to the left, and standard traffic patterns for runways 15, 18, and 21 shall be rectangular with all turns to the right, as depicted in the traffic pattern charts. The upwind leg will normally be along the runway-in-use, with the exception of Runways 9-27. Operations on Runways 9-27 shall conform to the traffic pattern and other required routing instructions, as specified by the Washington Tower. (NOTE: The southeast portion of patterns for Runways 15-33 shall be executed to complete the turn west of the Potomac River, as shown on traffic pattern charts. Specific clearance will be issued by the Washington Tower to cross the river and/or Bolling Field as necessary to accomplish take-off or landing.)

AVOID FLIGHT, WHENEVER PRACTICABLE, AT ALTITUDES BELOW 1200 FEET OVER RESIDENTIAL AREAS.

Entry to and Departure from Patterns

Entry to and departure from the Washington National Airport patterns shall be made as indicated on the traffic pattern charts, unless otherwise authorized by the Washington Tower.

Washington National Airport Traffic to and from the northeast may use the Northwest Passage or the Riverdale Lane with prior approval of the Washington Tower.

Bolling AFB - Anacostia NAS

Flight of aircraft in the Bolling AFB and Anacostia NAS traffic pattern shall at all times be confined to east of the Potomac River (except for turns after take-off from Runways 32 and 35 at Bolling, also 3 and 36 at Anacostia, as well as turns into final approach for Runways 14 and 17 at Bolling, also 18 and 21 at Anacostia, in which cases prior coordination will be effected with the Washington Tower by the appropriate military tower). Traffic normally will be at 1500 feet; however, in no case shall the pattern altitude exceed 1500 feet.

A standard right-hand traffic pattern shall be utilized for both airports when winds are from northerly directions. A standard left-hand traffic pattern shall be utilized for both airports when winds are from southerly directions.

LEGEND

TRAFFIC PATTERN ——→——, TRAFFIC PATTERN ENTRY - - - →- - -, TRAFFIC PATTERN DEPARTURE ⇨ PATTERN WITH WASHINGTON TOWER APPROVAL →→→→→→

Runway 3 Washington National Airport

Landing: (1) Maintain at least 1200 feet as long as practicable.
(2) Straight-in approaches, when authorized by the Washington tower, shall maintain at least 1200 feet until intercepting railroad near Masonic Temple.

Take-off: Climb to at least 1200 feet over the Potomac River. With approval of Washington tower, a right turn may be made after take-off for northeast bound traffic.

Runway 33 Washington National Airport

Landing: To execute a landing, flight over the river is necessary. Remain at least 1200 feet until over the Potomac River.

Take-off: Climb to at least 1200 feet over the Potomac River. Avoid flight over Pentagon if practicable.

Runway 36 Washington National Airport

Landing: Remain at least 1200 feet until over the Potomac River on final approach.

Take-off: Climb to at least 1200 feet over the Potomac River.

Runway 9-27: Operations on runways 9-27 shall conform to the traffic pattern and other required routing instructions as specified by the Washington tower.

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective 0001 EST, September 4, 1951, unless otherwise advised, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Green civil airway No. 2 (Seattle, Wash. to Boston, Mass.) is amended after Billings, Mont. rdo rng stn by deleting the words which read: "the intsxn of the NE crs of the Billings, Mont rdo rng and the SW crs of the Miles City, Mont. rdo rng"

(2) Amber civil airway No. 3 (El Paso, Texas to Great Falls, Mont.) is amended by changing Hot Springs, N. M. to read: "Truth or Consequences, N. M.".

(3) Red civil airway No. 4 is amended to read: (Albuquerque, N. M to Las Vegas, N. M.) From the Albuquerque, N. M. omnirng stn via the intsxn of the Albuquerque, N. M. omnirng 23° true enroute radial and the Santa Fe, N. M. omnirng 253° true enroute radial to the Santa Fe, N. M. omnirng stn. From the Santa Fe, N. M. Municipal arpt via the Las Vegas, N. M. rdo rng stn to the intsxn of the SE crs of the Las Vegas, N. M. rdo rng and the W crs of the Tucumcari, N. M. rdo rng.

(4) Red civil airway No. 81 is amended by changing caption to read: (Cadillac, Mich. to Elkins, W. Va.) and changing beginning of airway to read: From the Cadillac, Mich. non-directional rdo bcn via the Lansing, Mich. rdo rng stn; the intsxn of the SE crs of the Lansing, Mich. rdo rng and the W crs of the Detroit, Mich. rdo rng to the Toledo, Ohio omnirng stn."

CONTROL AREAS: (1) Green civil airway No. 3 (San Francisco, Calif. to New York, N. Y.) is amended after the portion which reads: Selinsgrove, Pa. omnirng stn to the Allentown, Pa. omnirng stn via the direct enroute radials to read: "from the Allentown, Pa. omnirng stn to the Caldwell, N. J. omnirng stn via the direct enroute radials, from the Allentown, Pa. omnirng stn to the Matawan, N. J. VHF VAR rdo rng stn via the Allentown omnirng direct enroute radial; from the Allentown, Pa. omnirng stn to the Linden, N. J. non-directional rdo bcn via the Allentown omnirng direct enroute radial; and from the Philipsburg, Pa. omnirng stn to the Allentown, Pa. omnirng stn via the Philipsburg 113° true and the Allentown 258° true alt change radials, excluding that portion which lies more than 3 miles S of the Allentown, Pa. omnirng 258° true alt change radial.

(2) Green civil airway No. 5 (Los Angeles, Calif. to Boston, Mass.) is amended by correcting Texarkana, Texas to read: "Texarkana, Ark." and by adding the following portion between the Texarkana omnirng stn and Memphis omnirng stn to read: "From the Texarkana, Ark. omnirng stn to the Pine Bluff, Akr. omnirng stn via the direct enroute and 15° S alt change radials; from the Pine Bluff, Ark. omnirng stn to the Memphis, Tenn. omnirng stn via the direct enroute and 15° S alt change radials".

(3) Amber civil airway No. 3 (El Paso, Texas to Great Falls, Mont.) is corrected to change the name "Hot Springs, N. Mex." to read: "Truth or Consequences, N. M." and by deleting the portion which reads: "From the intsxn of the Otto, N. M. omnirng 86° true enroute radial and the Las Vegas, N. M. omnirng 214° true enroute radial to the Las Vegas, N. M. omnirng stn via the Las Vegas, N. M. omnirng 214° true enroute radial" and by adding in lieu thereof: "From the Otto, N. M. omnirng stn to the Las Vegas, N. M. omnirng stn via the direct enroute radials".

(4) Amber civil airway No. 4 (Brownsville, Texas to Minot, N. Dak.) is amended before the portion which reads: "from the Ft. Worth, Texas omnirng stn to the Ardmore, Okla. omnirng stn...etc." to read: "from the Waco, Texas omnirng stn to the Ft. Worth, Texas omnirng stn via the direct enroute radials including all that area bounded on the SW and NW by Amber civil airway No. 4 and on the E by the Waco-Ft. Worth omnirng direct enroute radial".

(5) Amber civil airway No. 5 (Grand Isle, La. to Milwaukee, Wis.) is amended between the Memphis, Tenn. omnirng stn and the St. Louis, Mo. omnirng stn to read: "from the Memphis, Tenn. omnirng stn to the Malden, Mo. omnirng stn via the direct enroute and 15° W alt change radials; from the Malden, Mo. omnirng stn to the Farmington, Mo. omnirng stn via the direct enroute and 15° W alt change radials; from the Farmington, Mo. omnirng stn to the St. Louis, Mo. omnirng stn via the direct enroute and 15° W alt change radials".

(6) Amber civil airway No. 7 (Key West, Fla. to U. S. Canadian Border) is amended before the portion which reads: "from the West Palm Beach, Fla. omnirng stn to the Vero Beach, Fla. omnirng stn" by adding the following portion: "from the Key West, Fla. omnirng stn to the Miami, Fla. omnirng stn via the direct enroute and 15° SE alt change radials, including all the area bounded on the S and E by amber civil airway No. 7 and on the NW by the Key West to Miami 15° SE alt change radial."

(7) Red civil airway No. 4 is amended to read: (Albuquerque, N. M. to Las Vegas, N. M.) All of Red civil airway No. 4 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Albuquerque omnirng stn to the Santa Fe omnirng stn via the Albuquerque 23° true and Santa Fe 253° true enroute radials; from the Santa Fe, N. M. omnirng stn to the Las Vegas, N. M. omnirng stn via the direct enroute and 15° S alt change radials; from the Las Vegas, N. M. omnirng stn to the Tucumcari, N. M. omnirng stn via the direct enroute radials, including all that area bounded on the SW by Red civil airway No. 4 and on the NE by the Las Vegas-Tucumcari direct enroute radials and on the SE by the Anton Chico-Tucumcari 15° N alt change radial.

(8) Red civil airway No. 11 (Enid, Okla. to Boston, Mass.) is amended by changing the portion which reads: "from the Neosho, Mo. omnirng stn to the Springfield, Mo. omnirng stn via the direct enroute radials" to read: "from the Neosho, Mo. omnirng stn to the Springfield, Mo. omnirng stn via the direct enroute and 15° N and S alt change radials.

(9) Red civil airway No. 31 (Denver, Colo. to Minneapolis, Minn.) is amended by changing last portion to read: "from the Rapid City, S. Dak. omnirng stn to the Philip, S. Dak. omnirng stn via the direct enroute and 15° N alt change radials; from the Philip, S. Dak. to the Pierre, S. Dak. omnirng stn via the direct enroute and 15° S alt change radials; from the Pierre, S. Dak. omnirng stn to the Huron, S. Dak. omnirng stn via the direct enroute and 15° S alt change radials; from Huron, S. Dak. omnirng stn to the Watertown, S. Dak. omnirng stn via the direct enroute and 15° SE alt change radials.

(10) Red civil airway No. 52 is amended to read: (Memphis, Tenn. to Birmingham, Ala.) All that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Memphis, Tenn. omnirng stn to the Muscle Shoals, Ala. omnirng stn via the direct enroute and 15° S alt change radials.

(11) Red civil airway No. 59 is amended to read: (Garden City, Kans. to Oklahoma City, Okla.) All of Red civil airway No. 59 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Garden City, Kans. omnirng stn to the Gage, Okla. omnirng stn via the direct enroute and 15° E alt change radials including all that area bounded on the W and SW by Red civil airway no. 59 and on the NE by the Garden City-Gage direct enroute radials; from the Gage, Okla. omnirng stn to the Oklahoma City, Okla. omnirng stn via the direct enroute and 15° S alt change radials.

(12) Red civil airway No. 68 (El Paso, Texas to Shreveport, La.) is amended by adding the following to present control area: From the San Angelo, Texas omnirng stn to the Abilene, Texas omnirng stn via the intsxn of the San Angelo, Texas omnirng 72° true enroute radial and the Abilene, Texas omnirng 181° true enroute radial.

(13) Red civil airway No. 70 is amended to read: (Midland, Texas to Oklahoma City, Okla.) All of Red civil airway No. 70 including all that area within 5 miles either side of the direct enroute radials from the Midland, Texas omnirng stn to the Lubbock, Texas omnirng stn.

(14) Red civil airway No. 81 is amended by changing caption to read: (Cadillac, Mich. to Elkins, W. Va.)

(15) Red civil airway No. 88 (Albuquerque, N. M. to Hobbs, N. M.) is amended by deleting the words which read: "from the Albuquerque, N. M. omnirng stn to the Corona, N. M. omnirng stn via the direct enroute radials"; and by adding the following ro read: "from the Albuquerque, N. M. omnirng stn to the Corona, N. M. omnirng stn via the direct enroute and the Albuquerque, N. M. 103° true and Corona, N. M. 328° true alt change radials".

(16) Red civil airway No. 91 (Salt Flat, Texas to Hobbs, N. M.) is amended by deleting the following: "the intsxn of the Salt Flat, Texas omnirng 85° true enroute radial and the Carlsbad, N. M. omnirng 215° true enroute radial to the Carlsbad, N. M. omnirng 215° true enroute radial" and adding in lieu thereof: "from the Salt Flat, Texas omnirng stn to the Carlsbad, N. M. omnirng stn via the direct enroute radials."

(17) Blue civil airway No. 2 is amended to read: (Montgomery, Ala. to Erie, Pa.) All of Blue civil airway No. 2 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Chattanooga, Tenn. omnirng stn to the Knoxville, Tenn. omnirng stn via the direct enroute and 15° NW alt change radials. From the Elkins, W. Va. omnirng stn to the Morgantown, W. Va. rdo rng stn via the Elkins omnirng direct enroute radial; from the Morgantown, W. Va. rdo rng stn to the Pittsburgh, Pa. omnirng stn via the Pittsburgh omnirng direct enroute radial; from the Pittsburgh, Pa. omnirng stn to the Erie, Pa. omnirng stn via the direct enroute radials.

(18) Blue civil airway No. 9 (Columbia, Mo. to U. S. Canadian Border) is amended after the portion "from the Kirksville, Mo. omnirng stn to the Des Moines, Iowa omnirng stn via the direct enroute and 15° NE alt change radials" by adding the following portion to read: "from the Des Moines, Iowa omnirng stn to the Mason City, Iowa omnirng stn via the direct enroute and 15° E and W alt change radials. (8-14-51)

(19) Blue civil airway No. 21 is amended to read: (Charleston, W. Va. to Erie, Pa.) All of Blue civil airway No. 21 including all that area within 5 miles either side of the enroute radials from the intsxn of the Youngstown, Ohio omnirng 180° true enroute radial and the Pittsburgh, Pa. 320° true enroute radial to the Youngstown, Ohio omnirng stn via the Youngstown 180° true enroute radial.

(20) Blue civil airway No. 22 (Memphis, Tenn. to Wichita, Kans.) is amended by adding the following portion in beginning of control area: "From the Pine Bluff, Ark. omnirng stn to the Little Rock, Ark. omnirng stn via the intsxn of the Pine Bluff omnirng 07° true enroute radial and the Little Rock omnirng 141° true enroute radial.

(21) Blue civil airway No. 64 is amended to read: (Wink, Texas to Hobbs, N. M.) All of Blue civil airway No. 64 including all that area within 5 miles either side of the direct enroute radials from the Wink, Texas omnirng stn to the Hobbs, N. M. omnirng stn.

CONTROL AREA EXTENSIONS: (1) Control area extension (Springfield, Mo.) is amended to read: All that area within a 25 mile radius of the Springfield, Mo. rdo rng stn.

(2) Control area extension Presque Isle, Me. is amended by adding the following to the present control areas est.: "including all that area bounded on the N and NE by Blue 17, on the S by Red 86 and on the NW by Amber 7.

(3) Control area extension (Quincy, Ill.) is amended to read: All that area within a 25 mile radius of the Quincy non-directional rdo bcn.

(4) Control area extension (Casper, Wyo.) is amended to read: All that area within a 25 mile radius of the Casper, Wyo. rdo rng stn in the NE, SW and NW quadrants of the rdo rng excluding the portion which overlaps danger areas.

(5) Control area extension (Madison, Wis.) is amended by adding the following to the present control area extension: "and extending 5 miles either side of a bearing 183° true from the Truax Field outer mrkr to a point 25 miles S of the outer mrkr."

(6) Control area extension (Whidbey Island, Wash.) is amended to read: All that area beginning at lat. 48-30-00, long. 123-07-15, thence NE to lat. 48-35-50, long. 122-58-40, thence ENE to lat. 48-42-15, long. 122-41-00, thence southerly to lat 48-01-20, long. 122-27-10, thence northwesterly to lat. 48-06-30, long. 122-52-35, thence northwesterly to lat. 48-12-00, long. 122-59-30, thence to point of beginning, excluding the portions which overlap danger areas.

(7) Control area extension (Topeka, Kans.) is amended to read: All that area within a 25 mile radius of the Topeka, Kans. omnirng stn.

(8) Control area extension (Hutchinson, Kans.) is amended to read: All that area within a 25 mile radius of the Hutchinson, Kansas rdo rng stn.

(9) Control area extension (Lincoln, Nebr.) is amended by adding the following to present control area extension: "Including all that area within a 20 mi radius of the Lincoln, Nebr. rdo rng stn in the SW quadrant of the rdo rng."

(10) Control area extension (St. Louis, Mo.) is amended to read: All that area within a 25 mile radius of the St. Louis, Mo. rdo rng stn in the NE and SW quadrants of the rdo rng.

(11) Control area extension (Omaha, Nebr.) is amended to read: All that area within a 25 mile radius of the Omaha, Nebr. rdo rng stn in the NW and SE quadrants of the rdo rng.

(12) Control area extension (Tyler, Texas) is amended by adding the following to present control area extension: "including the area NE of the rdo rng stn bounded on the W by Red 37, on the N by Red 10 and on the S and SE by Red 68.

(13) Control area extension (Fairbanks, Alaska) is added to read: From the Fairbanks ILS lclzr extending 5 miles either side of the lclzr crs to a point 25 miles NE of the lclzr.

(14) Control area extension (Cheyenne, Wyo.) is added to read: All that area within a 25 mile radius of the Cheyenne, Wyo. rdo rng stn in the SE quadrant of the rdo rng.

(15) Control area extension (Denver, Colo.) is added to read: All that area within a 25 mile radius of the Denver, Colo. rdo rng stn in the SE quadrant of the rdo rng, excluding the portion which overlaps danger areas.

(16) Control area extension (Des Moines, Iowa) is added to read: All that area within a 25 mile radius of the Des Moines, Iowa rdo rng stn in the NW and NE quadrants of the rdo rng

(17) Control area extension (Rapid City, S. Dak.) is added to read: All that area within a 25 mile radius of the Rapid City, S. Dak. rdo rng stn in the NW, NE and SE quadrants of the rdo rng.

(18) Control area extension (Sheridan, Wyo.) is added to read: All that area within a 25 mile radius of the Sheridan, Wyo. rdo rng stn in the N and E quadrants of the rdo rng.

(19) Control area extension (Pueblo, Colo.) is added to read: All that area within a 25 mile radius of the Pueblo, Colo. rdo rng stn in the NE and SE quadrants of the rdo rng.

(20) Control area extension (Wichita, Kans.) is added to read: All that area within a 25 mile radius of the Wichita, Kans. rdo rng stn in the SE, SW and NW quadrants of the rdo rng.

(21) Control area extension (Toledo, Wash.) is added to read: From the Toledo, Wash. rdo rng stn extending 5 miles either side of the W crs of the Toledo, Wash. rdo rng to a point 25 miles W of the rdo rng stn, excluding the portion which overlaps danger areas.

(22) Control area extension (Oklahoma City, Okla.) is added to read: All that area within a 25 mile radius of the Oklahoma City, Okla. rdo rng stn.

(23) Control area extension (Shreveport, La.) is added to read: All that area within a 25 mile radius of the Shreveport, La. rdo rng stn including all that area within a 25 mile radius of the Barksdale Air Force rdo rng, Shreveport, La. lying to the E and SE of the Barksdale Air Force rdo rng bounded on the N by Red 10 and on the W by Red 30.

(24) Control area extension (Ft. Worth, Texas) is added to read: All that area SW of the Ft. Worth, Texas rdo rng stn bounded on the N by Green 5, on the E by Amber 4 and on the S and W by Red 68, and all that area NE of the Ft. Worth rdo rng stn bounded on the W by Amber 4, on the E by Blue 5, and on the S by Green 5 and on the SW by Red 10.

(25) Control area extension (Houghton, Mich.) is added to read: From the Houghton, Mich. rdo rng stn extending 5 miles either side of the N and S courses of the rdo rng to points 25 miles N and S of the rdo rng stn.

(26) Control area extension (Sault Ste. Marie, Mich.) is added to read: Within 5 miles either side of a bearing 330° true extending from the Kinross Arpt through the Kinross outer mrkr to its intsxn with the W crs of the Sault Ste Marie, Mich. rdo rng.

CONTROL ZONES: (1) 3 mile control zone section is amended by deleting the following arpts: El Dorado, Ark., Goodwin Field and Endicott, N. Y., Tri-Cities Arpt.

(2) 5 mile control zone section is amended by deleting the following arpts: Akron, Ohio, Akron-Canton Co.; Chicago, Ill. O'Hare International; Louisville, Ky., Standiford Field; Oceana, Va., Naval Auxiliary Air Station; St. Paul, Minn., Helman; Williams, Calif., CAA Intermediate Field.

(3) Providence, Rhode Island control zone is amended to read: Within a 5 mile radius of the Theodore Francis Green Arpt extending 2 miles either side of the SW crs of the Providence rdo rng to a point 14 miles SW of the rdo rng stn.

(4) Akron, Ohio control zone is amended to read: Within a 5 mile radius of the Akron Mun Arpt extending 2 miles either side of the SW crs of the Akron, Ohio rdo rng to a point 10 miles SW of the rdo rng stn, including a 5 mile radius of the Akron-Canton Co. Arpt extending 2 miles either side of the Akron-Canton ILS lclzr to a point 10 miles S of the outer mrkr.

(5) Alexandria, Minn. control zone is amended to read: Within a 5 mile radius of the Alexandria Mun Arpt extending 2 miles either side of the N crs of the Alexandria rdo rng to a point 10 miles N of the rdo rng stn, and within 2 miles either side of the 230° and 50° true radials of the Alexandria omnirng extending from the Alexandria arpt control zone to a point 10 miles NE of the omnirng stn.

(6) Bismarck, N. Dak. control zone is amended to read: Within a 5 mile radius of the Bismarck Mun Arpt extending 2 miles either side of the E crs of the Bismarck rdo rng to a point 10 miles E of the rdo rng stn, extending 2 miles either side of the Bismarck ILS lclzr crs to a point 10 miles SE of the outer mrkr, and extending 2 miles either side of the 114° true radials of the Bismarck omnirng to a point 10 miles SE of the omnirng stn.

(7) Chicago, Ill. control zone is amended by adding the following to the present control zone: "and extending 2 miles either side of the Chicago-Midway Arpt ILS lclzr crs to a point 10 miles NW of the Chicago-Midway outer mrkr.

(8) Cleveland, Ohio control zone is amended to read: Within a 5 mile radius of the Cleveland Mun Arpt extending 2 miles either side of the W crs of the Cleveland rdo rng to the Elyria FM extending 2 miles either side of the Cleveland ILS lclzr crs to a point 10 miles SW of the outer mrkr, and extending 2 miles either side of the 294° true radial of the Cleveland omnirng to a point 10 miles NW of the omnirng stn.

(9) Columbus, Ohio control zone is amended by adding the following to present control zone: "and extending 2 miles either side of the 50° true radial of the Columbus omnirng from the Port Columbus control zone to a point 10 miles NE of the omnirng stn.

(10) Dickinson, N. Dak. control zone is amended by adding the following to present control zone: "and extending 2 miles either side of the 15° true radial of Dickinson omnirng to a point 10 miles N of the omnirng stn.

(11) Evansville, Ind. control zone is amended to read: Within a 5 mile radius of Dress Memorial Mun arpt extending 2 miles either side of the N crs of the Evansville rdo rng to a point 10 miles N of the rdo rng stn and extending 2 miles either side of a 37° bearing from the Evansville outer mrkr to a point 10 miles NE of the outer mrkr.

(12) Fargo, N. Dak. control zone is amended by adding the following portion to present control zone: "and extending 2 miles either side of the 181° true radial of the Fargo omnirng stn from the Fargo-Hecton Arpt control zone to a point 10 miles S of the omnirng stn.

(13) Fort Wayne, Ind. control zone is amended to read: Within a 5 mile radius of Baer Field, Ft. Wayne, Ind. extending 2 miles either side of the SW crs of the Fort Wayne, Ind.

(8-14-51)

rdo rng to a point 10 miles SW of the rdo rng stn, extending 2 miles either side of the Ft. Wayne ILS lclzr crs from the lclzr to a point 10 miles SE of the outer mrkr, and extending 2 miles either side of the 318° true radial of the Ft. Wayne omnirng from the Baer Field ctl zone to a point 10 miles NW of the omnirng stn.

(14) Indianapolis, Ind. control zone is amended by adding the following to present control zone: "extending 2 miles either side of the Weir-Cook County Airport lclzr crs to a point 10 miles SW of the outer mrkr and extending 2 miles either side of the 323° true radial of the Indianapolis omnirng from the Weir-Cook County Arpt ctl zone to a point 10 miles NW of the omnirng stn.

(15) Jamestown, N. Dak. control zone is amended to read: Within a 5 mile radius of the Jamestown Mun Arpt extending 2 miles either side of the E crs of the Jamestown rdo rng to a point 10 miles E of the rdo rng stn and extending 2 miles either side of the 191° true radial of the Jamestown omnirng stn from the Mun Arpt ctl zone to a point 10 miles S of the omnirng stn.

(16) Lansing, Mich. control zone is amended to read: Within a 5 mile radius of the Capital City Arpt extending 2 miles either side of the E crs of the Lansing rdo rng to a point 10 miles E of the rdo rng stn and extending 2 miles either side of the 232° true radial of the Lansing omnirng from the Capital City Arpt control zone to a point 10 miles SW of the omnirng stn.

(17) Lafayette, Ind. control zone is amended to read: Within a 5 mile radius of Purdue University Arpt extending 2 miles either side of the SW crs of the Lafayette rdo rng to a point 10 miles SW of the rdo rng stn and extending 2 miles either side of the 129° true radial of the Lafayette omnirng to a point 10 miles SE of the omnirng stn.

(18) Lone Rock, Wis. control zone is amended to read: Within a 5 mile radius of the Mun Arpt and extending 2 miles either side of the W crs of the Lone Rock rdo rng to a point 10 miles W of the rdo rng stn, and extending 2 miles either side of the 24° true radial of the Lone Rock omnirng from the Lone Rock Mun Arpt ctl zone to a point 10 miles NE of the omnirng stn.

(19) Louisville, Ky. control zone is amended to read: Within a 5 mile radius of Standiford Field and within a 5 mile radius of Bowman Field extending 2 miles either side of the E crs of the Louisville rdo rng to the Eastwood FM, extending 2 miles either side of the Standiford Field ILS lclzr crs from the lclzr to the limits of the Ft. Knox, Ky. danger area extending 2 miles either side of the 122° true radial of the Louisville omnirng from the Standiford Fld ctl zone to a point 10 miles SE of the omnirng stn, and extending 2 miles either side of the 154° true radial of the Louisville omnirng from the Bowman Fld ctl zone to a point 10 miles SE of the omnirng stn.

(20) Madison, Wis. control zone is amended to read: Within a 5 mile radius of Truax Arpt extending 2 miles either side of the SE crs of the Madison rdo rng to a point 10 miles SE of the rdo rng stn, and extending 2 miles either side of the 183° true crs of the Truax Fld outer mrkr from the Truax Fld ctl zone to a point 10 miles S of the outer mrkr.

(21) Milwaukee, Wis. control zone is amended by adding the following to present ctl zone: "and extending 2 miles either side of the 187° true radial of the Milwaukee omnirng from the General Mitchell Arpt ctl zone to a point 10 miles S of the omnirng stn.

(22) Moline, Ill. ctl zone is amended by adding the following to present ctl zone: "and extending 2 miles either side of the 294° true radial of the Moline omnirng from the Quad City Arpt ctl zone to a point 10 miles NW of the Moline omnirng stn.

(23) Muskegon, Mich. control zone is amended to read: Within a 5 mile radius of Muskegon, Co. Arpt extending 2 miles either side of the SE crs of the rdo rng to a point 10 miles SE of the rdo rng stn, and extending 2 miles either side of the 145° true radial of the Muskegon omnirng to a point 10 miles SE of the omnirng stn.

(24) Rochester, Minn. control zone is amended to read: Within a 5 mile radius of the Rochester Arpt extending 2 miles either side of the S crs of the rdo rng to a point 10 miles S of the rdo rng stn, and extending 2 miles either side of the 222° true radial of the Rochester omnirng from the Rochester Arpt ctl zone to a point 10 miles SW of the omnirng stn.

(25) Detroit, Mich. control zone is amended to read: Within a 5 mile radius of the Detroit-Wayne Major Arpt and within a 6 mile radius of the Willow Run Arpt extending 2 miles either side of the Willow Run ILS lclzr crs to a point 10 miles SW of the outer mrkr extending 2 miles either side of the back crs of the Willow Run ILS lclzr to a point 10 miles NE of the Ford non-directional rdo bcn, and extending 2 miles either side of the 309° true radial of the Detroit omnirng from the Wayne Major ctl zone to a point 10 miles NW of the omnirng stn.

(26) South Bend, Ind. control zone is amended to read: Within a 5 mile radius of St. Joseph Co. Arpt extending 2 miles either side of the W crs of the South Bend rdo rng to the New Carlisle FM, extending 2 miles either side of the front crs of the South Bend ILS lclzr from the St. Joseph Co. Arpt control zone to a point 10 miles E of the outer mrkr, and extending 2 miles either side of the 359° true radial of the South Bend omnirng to a point 10 miles N of the omnirng stn.

(27) Toledo, Ohio control zone is amended to read: Within a 5 mile radius of the Toledo Mun Arpt extending 2 miles either side of the S crs of the Toledo rdo rng to the Bowling Green FM, and extending 2 miles either side of the 134° true radial of the Toledo omnirng to a point 10 miles SE of the omnirng stn.

(28) Bowling Green, Ky. control zone is amended to read: Within a 5 mile radius of the Bowling Green Mun Arpt extending 2 miles either side of the SE crs of the Bowling Green rdo rng to a point 10 miles SE of the rdo rng stn, and extending 2 miles either side of the 203° true radial of the Bowling Green omnirng to a point 10 miles SW of the omnirng stn.

(29) LaCrosse, Wis. control zone is amended to read: Within a 5 mile radius of the LaCrosse Mun Arpt extending 2 miles either side of the NW crs of the LaCrosse rdo rng to a point 10 miles NW of the rdo rng stn and extending 2 miles either side of the 146° true radial of the LaCrosse omnirng to a point 10 miles SE of the omnirng stn.

(30) Mansfield, Ohio control zone is amended by adding the following portion to present control zone: "and extending 2 miles either side of the 130° true radial of the Mansfield omnirng from the Mansfield Mun Arpt ctl zone to a point 10 miles SE of the omnirng stn.

(31) Fairbanks, Alaska ctl zone is amended by adding the following: "excluding the portion which overlaps danger areas".

(32) Cincinnati, Ohio control zone is amended by adding the following to present control zone: "extending 2 miles either side of the N crs of the Cincinnati ILS lclzr to its intsxn with the NW crs of the Cincinnati rdo rng, and extending 2 miles either side of the 223° true radial of the Cincinnati omnirng to a point 10 miles SW of the omnirng stn.

(33) Oceana, Va. control zone is added to read: Within a 5 mile radius of the Oceana Va. Naval Auxiliary Air Stn excluding the portion overlapping danger areas.

(34) Chicago, Ill. control zone is added to read: Within a 5 mile radius of the Chicago O'Hare Intn'l Arpt extending 2 miles either side of the O'Hare ILS lclzr to a point 10 miles NW of the O'Hare outer mrkr.

(35) St. Paul, Minn. control zone is added to read: Within a 5 mile radius of Holman Field, St. Paul, Minn. extending 2 miles either side of the 40° true and 220° true radials of the Minneapolis, Minn. omnirng from the Holman Field control zone to a point 10 miles SW of the Minneapolis omnirng stn.

REPORTING POINTS: (1) Amber civil airway No. 3 (El Paso, Texas to Great Falls, Mont.) is corrected by changing the name Hot Springs, N. M. to read: Truth or Consequences, N. M.

(2) Red civil airway No. 81 is amended by changing the caption to read: (Cadillac, Mich. to Elkins, W. Va.)

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z . . . . VHF station location marker at a range station.

FREQUENCY LEGEND

V = 135.9 and 135.0 mc transmitted.
# = Guards same VHF frequencies station transmits except 122.2 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3) - 135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(8-28-51)

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.
(D) = Day. (N) = Night. → = New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

(8-28-51)

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U. S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U. S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	C	-Commercial	MG	-Misc. Govt
A	-Army (May also be used by Army Nat'l Guard)	CG	-Coast Guard	N	-Navy
		I	-Intermediate	NG	-Air Nat'l Guard
		M	-Municipal	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.,

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

Air Force and Navy fuels

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U. S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, USAF Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters USAF ACIS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

✓ VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:
Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

	8...134.64			GCA
	9...126.18			Control towers
	Guard....121.5			Military Emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W...109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

COAST GUARD: 1...( ); 2...135.9/135; 3...142.74; 4...142.02; 5...132.3; 6...( ); 7...143.28; 8...143.64; 9...126.18; 10...( ) 11...120.3 (ARTC Centers); 12...as required; 13...(CAA aerodrome gnd ctl) or as required; 14...(CAA aerodrome gnd ctl) or as required; 15-16-17-18 as required; Guard 121.5

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion; Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A. N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

(8-28-51)

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

CHANGE IN VHF CHANNELIZATION: Effective September 1, 1951, VHF/DF service on 136.88 mc will be discontd and service conducted on 137.88 mc (Channel C). VHF/DF on freq. 137.88 mc will be on secondary basis to use of frequency by Military Airways; and for GCA by 4-channel equipped aircraft.

UHF CHANNELIZATION: An initial UHF channelization plan has been approved for USAF and USN UHF-equipped aircraft in the U. S. and will be published in subsequent issues of the Radio Facility Charts. UHF frequencies which are being first implemented at USAF stations on a continuing program beginning 1 July 1951 are:

Channel 1	Control tower (military primary)	236.6 mc
" 15	Military Airways	258.20 mc
" 17	GCA	335.80 mc
" 18	GCA	289.40 mc
Guard	Military emergency	243.00 mc

It is contemplated that CAA stations, towers and centers will provide service on UHF. The channels to be used and the date that the services are to be available will be published later.

CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-28, dtd Feb. 5, 1951. Daniel Field, Augusta, Ga. Change: Ceiling over aerodrome to 500' and min alt over aerodrome to 927'.

(2) AL-178, dtd June 9, 1950. Greensboro-High Point Arpt, Greensboro, N. C. Change Initial apch alt SW crs to: 2800' from Int. N crs Charlotte, 2300' from Int. SE crs INT rng.

(3) AL-218, dtd Feb. 9, 1951. McGhee-Tyson Arpt, Knoxville, Tenn. Change initial apch alt. S crs 7000' from Navy Atlanta L/F rng; 3500' from Tallassee FM. W crs 3000' from NE crs Chattanooga L/F rng. N crs 4700' from Corbin VAR, 3000' from Inskip FM and 2000' from Inskip FM (Final). Change visual ctc alt from 4000' to 4500'.

(4) AL-277, dtd Jan. 24, 1951. Muscle Shoals, Ala. Change initial apch to N crs 2500' from SW crs Nashville.

(5) AL-60, dtd Jan. 11, 1951. NAS New York (Floyd Bennett), N. Y. Change E crs to SE crs. Change W crs to NW crs 2000' from Newark L/F Rng, 1200' from Newark L/F Rng (Final), 800' after passing Flatbush Int. (Final). If visual ctc not established at authorized landing minimums within 1.9 mi after passing Navy Floyd Bennett Rng Stn or landing not accomplished, climb to 1500' on SE crs and ctc Navy Floyd Bennett Twr.

(6) AL-516, dtd May 3, 1951. Raleigh-Durham Arpt, Raleigh, N. C. Change initial apch to S crs 2000' from Int. NE crs Florence. Change visual ctc alt from 2000' to 2100'.

(8-28-51)

CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: The low frequency rng procedure for McChord AFB is revised as follows: McChord AFB, Tacoma, Washington. LF rng procedure utilizing McChord rdo rng, freq. 272 kc, ident. TCM. Weather minimums: 600-1 day, 600-2 ngt. Initial apch: E crs - 8000' from int. W crs Ellensburg. S crs - 5000' from int. E crs Toledo. W crs - min enroute alt, 2000' from int S crs Shelton. N crs - 3000' from int. NW crs Seattle, 2000' from int. NE crs Shelton. Final apch S crs. Procedure turn. W side of S crs, 3000' within 10 mi, 4000' within 15 mi. Not authorized beyond 15 mi. Altitude over TCM rng on final apch: 1500'. Mag bearing and dist from TCM rng to arpt: 338°, 6.1 mi. If visual ctc not established within 6.1 mi after passing TCM rng. climb straight ahead for one minute, turn left and climb to 4000' on 215°, hold on Olympia Holding Pattern.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised or hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

ALASKA FLIGHT INFORMATION MANUAL: Because the last edition arrived so late from the printers. the issue scheduled for July 15, was not published. The next edition is scheduled for publication October 15, 1951.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no flights into or over foreign territory shall be made without prior authorization from foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtin countries.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The locations at which this direct communications procedure is available are listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing.

VERY HIGH FREQUENCIES FOR PRIVATE PILOTS: Use of very high frequency channels by the majority of private pilots has heretofore been limited to the channels 121.5, 122.1,122.5 and 122.8 mc. Now, however, any private pilot having need for additional channels may apply to the FCC for use of any of the 40 channels in the 118.1 to 126.7 mc band. To determine their additional requirements, pilots should consult the Airman's Guide (Radio Facilities Section) or contact the nearest CAA regional office for information concerning the channels which have been implemented at the various locations. Of particular interest may be the channel 126.7 mc which was previously limited to use by air carriers for communication with CAA stations (INSACS) but now may be used by any private pilot if required for that purpose.

DISCONTINUANCE OF 111.1-MC: Utilization of the frequency 111.1 mc for INSAC reply to private aircraft was authorized as an interim measure pending availability of other suitable reply channels. The primary assignment of 111.1 mc is for navigational aids and it is now required for that purpose. Effective August 1, 1951, therefore, the use of 111.1 mc for communication with private aircraft was discontinued at all INSACS. The new national ground-to-air call-up and reply channel for communication with private aircraft, 122.2 mc, was implemented at certain INSACS on August 1, 1951. Eventually, all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current NOTAMS for information on frequencies available at specific stations.

DVFR FLIGHT PLANS: When an IFR flight plan is canceled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

CIVIL AIRWAY, CONTROL AREA, CONTROL ZONE AND REPORTING POINT AMENDMENTS

Effective 0001 EST, September 4, 1951, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Green civil airway No. 6 (Laredo, Texas to Norfolk, Va.) is amended after New Orleans, La. rdo rng stn by adding the following portion to read: "the intsxn of the E crs of the New Orleans, La. rdo rng and the SW crs of the Mobile, Ala. rdo rng

(2) Green civil airway No. 8 (Cold Bay, Alaska to Northway, Alaska) is amended by deleting the words: via the Pt. Heiden, Alaska rdo rng stn and changing first portion to read: From the Cold Bay, Alaska rdo rng stn via the King Salmon, Alaska rdo rng stn.

(3) Red civil airway No. 30 (Shreveport, La. to Jacksonville, Fla.) is amended after the portion which reads: Baton Rouge, La. rdo rng stn to the intsxn of the SE crs of the Baton Rouge, La. rdo rng and the W crs of the New Orleans, La. rdo rng by adding the following portion to read: From the New Orleans, La. rdo rng stn to the Mobile, Ala. rdo rng stn.

(4) Red civil airway No. 40 is amended by changing caption to read: Red civil airway No. 40 (Kodiak, Alaska to Anchorage, Alaska) and by deleting the portion which reads: From the Port Heiden, Alaska rdo rng stn via the intsxn of the W crs of the Kodiak, Alaska rdo rng and the SE crs of the King Salmon, Alaska rdo rng; Kodiak, Alaska rdo rng stn. (Airway will now begin: From the Kodiak, Alaska rdo rng stn.....

(5) Red civil airway No. 84 (Lafayette, La. to Atlanta, Ga.) is amended by deleting the portion which reads: From the Callendar, La. non-directional rdo bcn via the intsxn of a bearing 70° true from the Callendar, La. non-directional rdo bcn with the SW crs of the Biloxi, Miss., Keesler AFB rdo rng to the Biloxi, Miss., Keesler AFB rdo rng stn.

(6) Blue civil airway No. 26 (Anchorage, Alaska to Nenana, Alaska) is amended by changing last portion to read: the intsxn of the NE crs of the Summit, Alaska rdo rng and the SE course of the Nenana, Alaska rdo rng via the Nenana, Alaska rdo rng stn to the intsxn of the NW crs of the Nenana, Alaska rdo rng and the W crs of the Fairbanks, Alaska rdo rng.

(7) Blue civil airway No. 27 is amended to read: (Kodiak, Alaska to Kotzebue, Alaska). From the Kodiak, Alaska rdo rng stn via the intsxn of the W crs of the Kodiak, Alaska rdo rng and the SE crs of the King Salmon rdo rng; King Salmon, Alaska rdo rng stn; Bethel, Alaska rdo rng stn; Nome, Alaska rdo rng stn to the Kotzebue, Alaska arpt.

(8) Blue civil airway No. 32 is amended by changing caption to read: Blue civil airway No. 32 (Pendleton, Oreg. to Talkeetna, Alaska) and by changing the last portion to read: From the Skwentna, Alaska rdo rng stn to the Talkeetna, Alaska non-directional rdo bcn.

CONTROL AREAS: (1) Green civil airway No. 7 is amended to read: (Nome, Alaska to Fairbanks, Alaska). From a line extended at right angles across such airway through a point 25 miles W of the intsxn of the W crs of the Fairbanks, Alaska rdo rng and the NW crs of the Nenana, Alaska rdo rng to the Fairbanks, Alaska rdo rng stn.

(2) Green civil airway No. 8 is amended to read: (Cold Bay, Alaska to Northway, Alaska) From a line extended at right angles across such airway through a point 50 miles SW of the King Salmon, Alaska rdo rng stn to the Northway, Alaska rdo rng stn.

(3) Amber civil airway No. 2 is amended to read: (Long Beach, Calif. to Point Barrow, Alaska). All those portions of Amber civil airway No. 2 within the limits of the continental U. S. From the intsxn of the NW crs of the Snag, Yukon Territory rdo rng and the U. S. Canadian Border to a line extended at rgt angles across such airway through a point 25 miles NW of the intsxn of the W crs of the Fairbanks, Alaska rdo rng and the NW crs of the Nenana, Alaska rdo rng.

(4) Red civil airway No. 40 is amended by changing caption to read: (Kodiak, Alaska to Anchorage, Alaska).

(5) Blue civil airway No. 27 is amended to read: (Kodiak, Alaska to Kotzebue, Alaska). From the Kodiak, Alaska rdo rng stn to a line extended at rgt angles across such airway thru a point 50 miles NW of the King Salmon, Alaska rdo rng stn.

(6) Blue civil airway No. 32 is amended by changing caption to read: (Pendleton, Oreg. to Talkeetna, Alaska).

CONTROL AREA EXTENSIONS: Control area extension (New Orleans, La.) is amended by changing the northern boundary to read: Green civil airway No. 6.

CONTROL ZONES: The 5 mile control zone section is amended by deleting the following airport: Port Heiden, Alaska; Port Heiden Airport.

REPORTING POINTS: Green civil airway No. 7 is amended to read: (Nome, Alaska to Fairbanks, Alaska). The intsxn of the W crs of the Fairbanks, Alaska rdo rng and the NW crs of the Nenana, Alaska rdo rng; Fairbanks, Alaska rdo rng stn.

(2) Green civil airway No. 8 (Cold Bay, Alaska to Northway, Alaska) is amended by deleting the following compulsory reporting point: "Port Heiden, Alaska rdo rng stn."

(3) Amber civil airway No. 7 (Key West, Fla. to U. S. Canadian Border), is amended after "Augusta, Maine rdo rng stn" by adding the following compulsory reporting point: "the intsxn of the SW crs of the Millinocket, Me. rdo rng and the NW crs of the Bangor, Me. rdo rng."

(4) Red civil airway No. 22 (Mount Clemens, Mich. to Albany, N. Y.) is amended by adding the following compulsory reporting point to present reporting point: "the intsxn of the SE crs of the Utica, N. Y. rdo rng and the W crs of the Albany, N. Y. rdo rng.

(5) Red civil airway No. 40 is amended by changing caption to read: (Kodiak, Alaska to Anchorage, Alaska), and by deleting the following compulsory reporting point: "The intsxn of the W crs of the Kodiak, Alaska rdo rng and the SE crs of the King Salmon, Alaska rdo rng.

(6) Blue civil airway No. 27 is amended to read: (Kodiak, Alaska to Katzebue, Alaska). The intsxn of the W crs of the Kodiak, Alaska rdo rng and the SE crs of the King Salmon, Alaska rdo rng.

(7) Blue civil airway No. 32 is amended by changing caption to read: (Pendleton, Oregon to Talkeetna, Alaska).

DANGER AREA DESIGNATIONS

The following Danger Area amendments shall be effective as dated unless otherwise advised:

AMENDMENT NO. 83 (Sept. 7, 1951)

(1) A Presque Isle, Maine area is added to read: Location: Presque Isle (Aroostook Chart); Description: Beginning at lat. 47-00-00, long. 68-25-00; SSW to lat. 46-30-00; long. 68-35-00; WNW to lat. 46-45-00, long. 69-45-00; NNE to lat. 47-20-00, long. 69-15-00; SE to lat. 47-00-00, long. 68-25-00, point of beginning; Altitudes: 5,000 ft, to unlimited; Time: continuous; Using Agency: Preque Isle AFB, Me.

(2) The Great Bay, N. J. area published on July 16, 1949 in 14 F. R. 4293, is deleted.

(3) The Oceanville, N. J. area published on July 16, 1949 in 14 F. R. 4293, is deleted.

(4) A Brigantine, New Jersey area is added to read: Location: Brigantine (Washington Chart); Description: Beginning at lat. 39-28-01, long. 74-13-25; SW to lat. 39-22-30, long. 74-19-40; NW to lat. 39-26-02, long. 74-25-55; NE to lat. 39-32-31, long. 74-19-53; SE to lat. 39-29-01, long. 74-13-25, point of beginning; Altitudes: Surface to 20,000 ft.; Time: Daylgt hours, 7 days a week, VFR weather conditions only; Using Agency: Atlantic City Naval Air Station.

(5) The Lake Ontario (Wilson), New York area published on May 17, 1951, in 16 F. R. 4609, is amended by changing the "Time of Designation" column to read: "Daylight hours only".

(6) The Waco, Texas areas are added to read: Location: Waco (Austin Chart); Description: (1) E boundary: long. 98-13-00; W boundary: long. 98-15-00; N boundary: lat. 31-21-50; S boundary: lat. 31-20-10; (2) E boundary: long. 98-32-30; W boundary: long. 98-34-30; N boundary: lat. 31-16-50; S boundary: lat. 31-15-10; (3) E boundary: long. 98-24-00; W boundary: long. 98-26-00; N boundary: lat. 31-03-20; S boundary: lat. 31-01-40; Altitudes: Surface to 12,000 ft.; Time: Daily, sunrise to sunset; Using Agency: Connally AFB, Waco, Texas.

ON REQUEST REPORTING POINT

Effective immediately the following on-request reporting point is established: SHERRILL INTSXN - the intsxn SE crs Syracuse, N. Y. rng and SW crs Utica, N. Y. rng.

NON-STANDARD HOLDING PATTERN

Effective immediately the following non-standard holding pattern is established: Holding point - Sherrill intsxn (SE Syracuse, N. Y. and SW Utica, N. Y.); Direction from holding point - SE; direction of turn - LEFT on SW side of SE crs of Syracuse, N. Y. rng.

CORRECTIONS TO FLIGHT INFORMATION MANUAL

Correct Flight Information Vol. 5, No. 2, dated June 15, 1951:

(1) Page 12. Delete Hayes Center, Neb. CAA INSAC and add Imperial, Neb. CAA 287.

(2) Page 193. Under VHF Omnirange Procedures (VOR). Change class of station at Columbus, Ga. to read BVOR.

(3) Page 198. Under VHF Omnirng Procedures (VOR). Change distance Bay Minette radio beacon to Mobile, Ala. VOR to 31 miles.

(8-28-51)

(4) Page 209. Under Automatic Direction Finding Procedures, Dyersburg, Tenn. Remarks should read: "*Rbn is located on E side of arpt."

(5) Page 11. Lafayette, La. CAA INSAC number should read: 8-3752.

(6) Page 66. Delete listing at Lafayette, La. of KLKY and add following: Call letters: KLFY; Freq. 1420 kc, Power: 1000 watts day and 500 watts at ngt; Location: lat. 30-13-28, long. 92-03-31; Elev. 39'; Tower height above ground: 194'; Type: DA-N; Hours of operation: 0600-2330.

AERONAUTICAL ADVISORY STATIONS (FREQUENCY 122.8 mc): This frequency is known in some areas as the "private flyers frequency" and also as "UNICOM". Licenses for ground stations and aircraft are now being issued by the FCC subsequent to receipt of application for license from private pilots and airport operators eligible to use the frequency. Under the FCC rules, private aircraft may use 122.8 mc for communication with aeronautical advisory stations and between private aircraft themselves while in flight. Particular attention is invited to Section 9.1001 which follows:

"9.1001 Eligibility for station license. Authorizations for aeronautical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station. Only one Aeronautical Advisory station will be authorized at a landing area."

The scope of service to be rendered under FCC rules for the ground station is:
"9.1004 Scope of service. (a) Communications shall be limited to the necessities of safe and expeditious operation of aircraft. The service shall be advisory in nature, pertaining to the condition of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations. (b) Aeronautical Advisory stations shall not be used for the control of aircraft."

The following locations have been reported as having Aeronautical Advisory Service Available:

Muncie Arpt, Ind. (daytime hours)
Davenport Arpt, Iowa (0730-2000)
Revere Arpt, Mass. (0900-Sunset)
Flat Rock-Nan-Bar Arpt, Mich. (0800-sunset and hrs prior req.)
McAllen Arpt, Texas (0800-1900)
Concord Arpt, N. H. (daylight hours)
Keene-Dillant-Honkins Arpt, N. H. (daylight hours)
Laconia Arpt, N. H. (daylight hours)
Lebanon Arpt, N. H. (daylight hours)
Odessa, Texas-Ector Arpt (0800-dark)

Airport operators interested in providing this service may obtain further details from the nearest FCC or CAA field office.

AIR TRAFFIC CLEARANCES: The initial traffic clearance issued to an aircraft prior to departure will normally authorize flight to the point of first intended landing, with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request any desired altitude changes en route. Better service can be given the pilot if any altitude change is requested at the time the change is desired. An amendment to the initial clearance may be issued to a flight at any time the air traffic controller deems such action necessary to avoid possible confliction between enroute, landing, or departing aircraft. A flight is always cleared to a specific point or location (radio or visual reporting point), defined as a clearance limit. If the assigned altitude is below the minimum for a subsequent portion of the flight and radio failure is experienced, the procedures outlined under TWO-WAY RADIO FAILURE must be followed to insure proper terrain clearance.

Whenever an aircraft has been cleared to a point other than the destination airport it is the responsibility of Air Traffic Control to issue whatever further clearance is appropriate at least five minutes before the aircraft arrives at the clearance limit, unless holding instructions and a time at which the pilot may expect further clearance have been received and acknowledged by the pilot. In the event a pilot arrives at a clearance limit without having received either a clearance beyond or holding instructions at such fix, he should immediately request further clearance and hold at the clearance limit, maintaining the last assigned altitude, until further clearance is received. When a clearance limit is a point other than the destination airport, the altitude of the aircraft at this clearance limit will be protected so that separation will exist in the event the aircraft must hold awaiting further clearance.
NOTE: The foregoing should not be construed as being related in any way to the procedures which apply when a two-way radio failure occurs.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (7-25)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (7-16)
BIRMINGHAM-RADIO: June 25, omnirng shut down - reletn.
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. (5-23) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
DOTHAN-NAPIER FLD: Ctn - vehicles on rnwys. (8-20)
EVERGREEN-RADIO: Omnirng figt-checked, radials 240° clockwise thru 280° displaced counter clockwise 1°. Crs displacement in cone area slightly greater than normal. (8-13)
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn.
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of paraHel rnwys. (9 -20)
*MOBILE-RADIO: Aug 28, SW crs LF rng realigned from 67° to 37°. These data revd too late for inclusion on ANRA page.
MONTGOMERY-RADIO: A maximum of one half degree in excess of allowable error will be found in E sector omnirng between radials 90° and 118°. (6-14)
ARIZONA: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (4-2)
LUKE AFB (PHOENIX): Ctn - exten const all rnwys. (2-15) Rnwy 3-21 clsd (const). (5-2)
PRESCOTT ARPT: Strip at end rnwy 3-21 clsd until approx Oct 20 - const. Use rnwys only. (8-17)
ARKANSAS: BENTON ARPT: W half N/S Strip clsd (const). (6-12)
BRINKLEY-FEDERER MEMORIAL ARPT, SITE 37, DAL-LOU: Clsd ngts. Rows of dirt on SW end NE/SW Strip, use emerg only. (5-17)
FLIPPIN-RADIO: Aug. 9, omnirng shut down until approx Oct 29 - modernization. (8-9)
FT. SMITH ARPT: Equip. on W end E/W Rnwy. (7-24)
LITTLE ROCK-ADAMS FLD-TOWER: Transmission and reception poor on all VHF freqs S to W account obstns near temp twr until approx Oct. 1. Apch ctl on rng freq 353 kc not avail until approx Oct. 1. (7-30) FLD: Ctn lndg N or NE, vision of ctl twr partially obstd. (5-14) Lmtd NG svcg. (10-24) Rnwy 14-32 clsd (repairs). (8-6)
TEXARKANA-RADIO: About Sept 3, omnirng will be shut down until approx Nov. 3 - modernization. (8-13)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
**WALNUT RIDGE ARPT: 250' obstn lgtd rdo twr erected 13 mi NE (22° T) at lat 36-17-30, long. 90-50-15. (8-7)
CALIFORNIA: BAKERSFIELD-RADIO: Omnirng has slight to moderate scalloping in SE quad 80° to 123°.

[redacted]: BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans jet acft. (8-27)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CAMP COOKE (LOMPOC): Authorized visiting acft enter on heading of 290° at 2,000' from town of Lompoc, to avoid active firing rngs. (6-25)
CASTLE AFB (MERCED)-RADIO: USAF LF rng unreliable. (7-24)
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (3-13)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CRESCENT CITY-DEL NORTE CO. ARPT: Drifting sand across W end taxi strip leading to Rnwy 11. Use rnwy for taxying only. (5-18)
EDWARDS AFB (MUROC): Lctd within a danger area. Acft will not carry trans passengers to this fld. Gtc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (4-23)
FORT ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (8-28)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (4-5)
LOS ANGELES-RADIO: Visual-aural rng has moderate scalloping in N sector. (8-13)
LOS ANGELES-AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: About Sept 1, transmitter and rcvr 120.3 mc will be commd. (8-13)
LOS ANGELES INTERNATIONAL ARPT: Rnwy 7R-25L usable portion reduced to 4500' from apch end 25L, const across W end. Rnwy 25L clsd for take-offs and Rnwy 7R clsd lndgs 0700-1700 daily xcpt Sat and Sun. Rnwys 4-22 and 11-29 clsd (const.) Equip. on and adj const area. Use paved areas only. Two green transverse bar lgts mrk threshold Rnwy 25L. (8-13)
MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. (1-15) Ext const all rnwys. (8-1)
★McCLELLAN AFB (SACRAMENTO)-RADIO: USAF homing fac lctd lat 38-43-35, long. 121-23-59. (8-14)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21)
NEEDLES ARPT, SITE 25A, LAX-AMA: 80 octane gas not avail. (7-19)
NORTON AFB (SAN BERNARDINO): Ctn- equip. on fld days. (3-29)
OAKLAND-RADIO: Omnirng maximum usable dist, 40 mi N thru E at minimum inst alt. (6-18)
OAKLAND ARPT: Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg are from hangar 3 to W bndry. (8-16)
PALMDALE-LOS ANGELES CO. ARPT: 70' unlgtd bldg 1200' NW of SW end Rnwy 22. (7-18)
PASO ROBLES-RADIO: About Oct 1, visual-aural rng will be shut down until Dec 21-relctn and conversion to VOR. (8-25)
★SACRAMENTO ARPT-TOWER; CAA ILS cmsnd Aug 18, 1951. Serves NE/SW Rnwy with apch from SW. Lclzr lctd 789' NE of N end Rnwy on extended centerline. Freq: 110.3 mc ident: SAC. Voice avail. Glide path lctd 1100' NE of S end Rnwy, 400' E of Rnwy centerline. Freq 335 mc. MM lctd 3100' (0.59mi) SW of S end Rnwy on extended centerline. LMM freq: 263 kc. Ident: AC. OM lctd 4.6 mi SW of S end Rnwy on extended centerline. LOM freq: 356 kc; ident: SA. (8-18)
SALINAS-RADIO: About Aug 30, visual-aural rng will be shut down until approx Sept 30 - conversion to VOR fac. (8-22)
**SAN ARDO ARPT: Reinstated. Lat 36-01-30, long. 120-54-30. (8-20)
SAN DIEGO-RADIO: Omnirng has lgt to moderate scalloping in all quads. (6-12) LemonGrove FM on E crs LF rng reduced in power to 80 watts. (7-24)
SAN DIEGO-LINDBERGH FLD: Const on ramp adj to terminal bldg. (8-14)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious

[redacted]: Base, tfc lanes at North Island. (2-21)
SAN DIEGO-NAS SEAPLANE BASE: Sealane mrkrs under const. Perm pile-mounted day mrkrs and seadrome lgts are being installed in S San Deigo Bay to delineate the sealanes. There are two sealanes each 1000' wide, extending NW/SE 14, 875', E/W 9,872'. Bndrys and ends of lanes mrkd, day, ngt. Ctn during lndg and take-off. It is also noted that due to mrkrs being pile-mounted the height above water will vary with the state of the tide.
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)
SAN FRANCISCO ARPT-TOWER: CAA ILS lclzr operg with slight scalloping. FLD: Apch lgts inop. Rnwys clsd days intermittently. Taxi with ctn. Equip. on fld days. (6-27)
SANTA ANA MCAF-LTA: Hrs opern: 0800-1630, Mon-Fri and to sunset on 30 min req. 0800-1200, Sat and to sunset on 30 min req. 0800 to sunset Sun on 30 min req. (5-18)
SANTA BARBARA-RADIO: About Sept 15, visual-aural rng will be discont. (8-26)
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end Rnwy 25 perm clsd to acft with 20,000 lbs or more gross wt. (8-20)
SANTA MONICA ARPT: 16" elevated lgts being installed both sides Rnwy 3-21. Rnwy 4-22 clsd. Rnwy 3-21 hazardous - const. (6-26)
SONORA-COLUMBIA ARPT: NW/SE Strip clsd. (8-2)
[redacted]: COLORADO-SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U.S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (8-8)
*BLANCA ARPT: Correct lat 37-25-15, long. 105-32-45. (5-25)
COLORADO SPRINGS: Small arms, mortar and artillery firing being conducted in entire area of Camp Carson Military Reservation during all hrs thru Sept 30, 1951. Area extends from lat 38-45-00, on N to lat 38-30-00, on S, and from long. 104-43-00 on E to State Hwy No. 115 on W. Caution advised all acft operating on Amber Arwy #3 in vcnty; operations should be conducted E of S crs of Colo. Sprgs. LF rng. (8-24)
DENVER NAS (BUCKLEY FLD)-RADIO: Navy X-band Radar Bcn, code 2-1-1, inop. (4-26)
DENVER NAS(BUCKLEY FLD): Rnwy 14-32 clsd (obstn). Taxi strip to Rnwy 7-25 under const. Acft may be routed to Lowry AFB in crosswind conditions. (8-9)
GRAND JUNCTION-RADIO: CAA ILS lclzr and glide path will be shut down Sept 4 until approx Sept 25. (8-7)
LAMAR-RADIO: Omnirng radials displaced counterclockwise as follows: 345° to 15° displaced 4°, 142° to 150° displaced 4°, 162° to 216° displaced 6°. (6-15) About Sept 3, omnirng will be shut down until approx Nov 3. (8-25)
PUEBLO: Ordnance depot approx 17 mi E at lat 28-16-53, long. 104-18-09, conducting all types of demolition work 0800-1630 daily, Mon thru Fri, during month of Aug. (5-31)
PUEBLO-RADIO: Aug 25, omnirng shut down until approx Sept 25-modification. (8-24)
PUEBLO ARPT # 2: Ctn-lndg Rnwy 26 and take-off Rnwy 8. 30' obstn in State Fairgrounds lctd 700' E and in line with Rnwy 8-26. (7-13)
TRINIDAD ARPT: Const- medium intensity rnwy lgts being installed Rnwy 3-21. 100'extension E on apron and new 600' taxiway from NE end apron to Rnwy 3-21 usable. (8-6)
CONNECTICUT: **CROMWELL SEAPLANE BASE: Abandoned. (8-27)
E. HARTFORD-RENTSCHLER ARPT: VFR flgt test operns days all alts in 75 mi radius. (1-4) 80' crane 500' NW apch end Rnwy 4 days. (5-14)
NEW HAVEN ARPT: Taxi strip from Admin Bldg to N end Rnwy 1-19 clsd. Const N end Rnwy 1-19. (6-15)

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z. . . . VHF station location marker at a range station.

FREQUENCY LEGEND

V = 135.9 and 135.0 mc transmitted.
# = Guards same VHF frequencies station transmits except 122.2 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(9-11-51)

RADAR AVAILABLE : How and Where

PAR = PRECISION APPROACH RADAR. ASR = AIRPORT SURVEILLANCE RADAR.
GCA = GROUND CONTROLLED APPROACH - MILITARY EQUIVALENT OF COMBINED ASR AND PAR EQUIPMENT

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Flight Information Manual.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.

(D) = Day. (N) = Night. ➤ = New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN addition TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	C	-Commercial	MG	-Misc. Govt
A	-Army (May also be used by Army Nat'l Guard)	CG	-Coast Guard	N	-Navy
		I	-Intermediate	NG	-Air Nat'l Guard
		M	-Municipal	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise).

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/96 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NOTICES TO AIRMEN

SPECIAL NOTICES

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, USAF Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters USAF ACIS.

In connection with the above; the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

✓ VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:
Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

AIR FORCE*	NAVY ARC-3, -5 SCR-522**	NAVY	ARMY	SERVICE

	9...126.18			Control towers
	Guard....121.5			Military Emergency
U...108.3				ILS localizers and VAR Ranges
V...108.7				"
W...109.1				"
X...109.5				"
Y...109.9				"
Z...110.3				"

COAST GUARD: 1...( ); 2...135.9/135; 3...142.74; 4...142.02; 5...132.3; 6...( ); 7...143.28; 8...143.64; 9...126.18; 10...( ) 11...120.3 (ARTC Centers); 12...as required; 13...(CAA aerodrome gnd ctl) or as required; 14...(CAA aerodrome gnd ctl) or as required; 15-16-17-18 as required; Guard 121.5

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion; Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A. N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fifth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with Revision 6. (Revisions 1-5 obsolete). Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

UHF CHANNELIZATION: An initial UHF channelization plan has been approved for USAF and USN UHF-equipped aircraft in the U. S. and will be published in subsequent issues of the Radio Facility Charts. UHF frequencies which are being first implemented at USAF stations on a continuing program beginning 1 July 1951 are:

Channel 1	Control tower (military primary)	236.6 mc
" 15	Military Airways	258.20 mc
" 17	GCA	335.80 mc
" 18	GCA	289.40 mc
Guard	Military emergency	243.00 mc

It is contemplated that CAA stations, towers and centers will provide service on UHF. The channels to be used and the date that the services are to be available will be published later.

CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-318, dtd May 1, 1951. Pensacola, Fla. Change: SW crs of Pensacola Rng from 69° to 77° mag and toward stn; other crs remain unchanged.

(2) AL-312, Tyndall AFB, Panama City, Fla. Change: Distance from Tyndall rng to arpt from 3 mi to 2.5 mi.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized. (9-11-51)

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian territory.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no flights into or over foreign territory shall be made without prior authorization from foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtin countries.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The locations at which this direct communications procedure is available are listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing.

VERY HIGH FREQUENCIES FOR PRIVATE PILOTS: Use of very high frequency channels by the majority of private pilots has heretofore been limited to the channels 121.5, 122.1,122.5 and 122.8 mc. Now, however, any private pilot having need for additional channels may apply to the FCC for use of any of the 40 channels in the 118.1 to 126.7 mc band. To determine their additional requirements, pilots should consult the Airman's Guide (Radio Facilities Section) or contact the nearest CAA regional office for information concerning the channels which have been implemented at the various locations. Of particular interest may be the channel 126.7 mc which was previously limited to use by air carriers for communication with CAA stations (INSACS) but now may be used by any private pilot if required for that purpose.

DISCONTINUANCE OF 111.1 MC: Utilization of the frequency 111.1 mc for INSAC reply to private aircraft was authorized as an interim measure pending availability of other suitable reply channels. The primary assignment of 111.1 mc is for navigational aids and it is now required for that purpose. Effective August 1, 1951, therefore, the use of 111.1 mc for communication with private aircraft was discontinued at all INSACS. The new national ground-to-air call-up and reply channel for communication with private aircraft, 122.2 mc, was implemented at certain INSACS on August 1, 1951. Eventually, all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current NOTAMS for information on frequencies available at specific stations.

DVFR FLIGHT PLANS: When an IFR flight plan is canceled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

AERONAUTICAL ADVISORY STATIONS (FREQUENCY 122.8 mc): This frequency is known in some areas as the "private flyers frequency" and also as "UNICOM". Licenses for ground stations and aircraft are now being issued by the FCC subsequent to receipt of application for license from private pilots and airport operators eligible to use the frequency. Under the FCC rules, private aircraft may use 122.8 mc for communication with aeronautical advisory stations and between private aircraft themselves while in flight. Particular attention is invited to Section 9.1001 which follows:

"9.1001 Eligibility for station license. Authorizations for aeronautical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station. Only one Aeronautical Advisory station will be authorized at a landing area!"

The scope of service to be rendered under FCC rules for the ground station is:
"9.1004 Scope of service. (a) Communications shall be limited to the necessities of safe and expeditious operation of aircraft. The service shall be advisory in nature, pertaining to the condition of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations. (b) Aeronautical Advisory stations shall not be used for the control of aircraft."

The following locations have been reported as having Aeronautical Advisory Service Available:

Concord Arpt, N. H. (daylight hours)
Davenport Arpt, Iowa (0730-2000)
Claremont Arpt, N. H. (daylight hours)
Flat Rock-Nan-Bar Arpt, Mich. (0800-sunset and hrs prior req.)
Keene-Dillant-Hopkins Arpt, N. H. (daylight hours)
Laconia Arpt, N. H. (daylight hours)
Lebanon Arpt, N. H. (daylight hours)
McAllen Arpt, Texas (0800-1900)
Muncie Arpt, Ind. (daytime hours)
Odessa, Texas-Ector Arpt (0800-dark)
Revere Arpt, Mass. (0900-sunset)
Nashua Arpt, N. H., Borie Fld (daylight hours)

Airport operators interested in providing this service may obtain further details from the nearest FCC or CAA field office.

AIR TRAFFIC CLEARANCES: The initial traffic clearance issued to an aircraft prior to departure will normally authorize flight to the point of first intended landing, with instructions to maintain the altitude at which the aircraft enters the next control area. The pilot should request any desired altitude changes en route. Better service can be given the pilot if any altitude change is requested at the time the change is desired. An amendment to the initial clearance may be issued to a flight at any time the air traffic controller deems such action necessary to avoid possible confliction between en route, landing, or departing aircraft. A flight is always cleared to a specific point or location (radio or visual reporting point), defined as a clearance limit. If the assigned altitude is below the minimum for a subsequent portion of the flight and radio failure is experienced, the procedures outlined under TWO-WAY RADIO FAILURE must be followed to insure proper terrain clearance.

Whenever an aircraft has been cleared to a point other than the destination airport it is the responsibility of Air Traffic Control to issue whatever further clearance is appropriate at least five minutes before the aircraft arrives at the clearance limit, unless holding instructions and a time at which the pilot may expect further clearance have been received and acknowledged by the pilot. In the event a pilot arrives at a clearance limit without having received either a clearance beyond or holding instructions at such fix, he should immediately request further clearance and hold at the clearance limit, maintaining the last assigned altitude, until further clearance is received. When a clearance limit is a point other than the destination airport, the altitude of the aircraft at this clearance limit will be protected so that separation will exist in the event the aircraft must hold awaiting further clearance. NOTE: The foregoing should not be construed as being related in any way to the procedures which apply when a two-way radio failure occurs.

✓**DANGER AREA DESIGNATIONS:** The following Danger Area amendment shall become effective on September 21, 1951, unless otherwise advised:

(1) The Ajo, Arizona, area, published on May 17, 1951, in 16 F. R. 4609, is amended by changing the "Using Agency" column to read: "Air Training Command, Luke AFB, Phoenix, Arizona, and Air Defense Command, Yuma County Airport, Yuma, Arizona".

(2) The Tyndall Air Force Base, Florida, Area I, published on May 26, 1950, in 15 F. R. 3212, and amended on August 7, 1951, in 16 F. R. 7696, is further amended by changing the "Description by Geographical Coordinates" column to read: "AREA I: Beginning at lat. 30-43-00, long. 85-14-00; SE to lat. 29-55-00, long. 84-32-00; WSW to lat. 29-42-45, long. 85-27-00; northerly paralleling the shoreline at a distance of 3 nautical miles to lat. 30-04-20, long. 85-45-45; NW to lat. 30-42-00, long. 86-06-00; easterly to lat. 30-43-00, long. 85-14-00, point of beginning.

(3) The Valparaiso, Florida, area, published on April 21, 1949, in 14 F. R. 1913, is hereby designated as two areas and revised to read: Location: Valparaiso (Mobile Chart); Description: EAST AREA: Beginning at a point on the southern edge of Red Civil Airway No. 30 at lat. 30-43-50, long. 86-10-30; counterclockwise around a circular arc of 3 mile radius centered at lat. 30-45-00, long. 86-07-40 to lat. 30-42-30, long. 86-07-10; southerly along the De Funiak Springs-Freeport Highway (State Highway No. 83) to the town of Freeport at lat. 30-30-00, long. 86-08-00; due S to the shoreline at lat. 30-19-00; southeasterly along the shoreline to lat. 30-18-00, long. 86-05-10; SE to a point 3 nautical miles from the shoreline at lat. 30-13-40, long. 86-01-50; westerly paralleling the shoreline to a distance of 3 nautical miles to lat. 30-19-50, long. 86-25-10; northerly to lat. 30-33-15, long. 86-25-30; due W to long. 86-28-25; northerly to lat. 30-43-20, long. 86-28-40; easterly along the southern edge of Red Civil Airway No. 30 to lat. 30-43-50, long. 86-10-30, point of beginning. WEST AREA: Beginning at lat. 30-43-05, long. 86-35-45; southerly to a point 3 nautical miles from the shoreline at lat. 30-20-30, long. 86-36-10; westerly paralleling the shoreline at a distance of 3 nautical miles to lat. 30-20-10, long. 86-48-00; due N to U. S. Highway No. 98 at lat. 30-24-40; westerly along U. S. Highway No. 98 to its intersection with the Nararre-Milton Highway (State Highway No. 87) at lat. 30-24-15, long. 86-52-15; northerly and westerly along State Highway No. 87 to lat. 30-33-40, long. 86-55-15; NE to lat. 30-43-00, long. 86-38-30; easterly to lat. 30-43-05, long. 86-35-45, point of beginning; Altitudes: Unlimited; Time: Continuous; Using Agency: Air Proving Ground, Eglin AFB, Valparaiso, Florida.

(4) The Camp Edwards, Mass. areas (1) and (2) published on April 21, 1949, in 14 F. R. 1913 are hereby designated as one area and revised to read: Location: Camp Edwards (Boston Chart); Description: Beginning at lat. 41-39-00, long. 70-35-00; NNE to lat. 41-41-00, long. 70-33-45; counterclockwise following the arc of a circle with a radius of 3 miles centered at lat. 41-43-30, long. 70-32-30 to lat. 41-42-10, long. 70-35-30; SSW to lat. 41-39-30, long. 70-36-30; ESE to lat. 41-39-00, long. 70-35-00, point of beginning; Altitudes: Unlimited; Time: Continuous; Using Agency: Dept. of Army, Camp Edwards, Mass.

(5) A Brant Island, N. C. area is added to read: Location: Brant Island (Norfolk Chart); Description: A circular area having a radius of 3 miles centered at lat. 35-12-30, long. 76-26-30; Altitudes: Surface to 10,000 ft.; Time: 0600 to 0300 daily; Using Agency: MCAS, Cherry Point, N. C.

(6) A Point of Marsh, N. C. area is added to read: Location: Point of Marsh (Norfolk Chart); Description: The area within a 3 mile radius of the following points: lat. 35-04-36, long. 76-28-12, lat. 35-01-37, long. 76-25-12; lat. 34-58-51, long. 76-25-15; lat. 35-01-24, long. 76-29-36; lat. 35-04-03, long. 76-26-00; Altitudes: Surface to 10,000 ft.; Time: 0600 to 0300 daily; Using Agency: MCAS, Cherry Point, N. C.

✓**INSTRUMENT APPROACH PROCEDURES:** The standard instrument approach procedures for the following airports have been CANCELLED, effective July 17, 1951: Very High Frequency (VAR) Radio Ranges: Lexington, Ky., Blue Grass Arpt.; Paducah, Ky., Barkley Field. Low Frequency Range: Seattle, Wash., Boeing Field Procedure No. 2. (This corrects Vol. 6 No. 10 in which the Boeing Field Procedure No. 2 was carried in error in the Flight Information Manual Supplement).

✓**REPORTING POINTS:** Compulsory Reporting Points: Effective Sept. 4, 1951, the following compulsory reporting points will be established: STARKVILLE INTSXN - The intsxn of the SE crs Utica, N. Y. rng and the NW crs Albany, N. Y. rng. EAST DOVER INTSXN The intsxn of the SW crs Millinocket, Me. rng and the NW crs of Bangor, Me. rng.

On-Request Reporting Point - Effective immediately the following on-request reporting point is established: MARCO INTSXN - The intsxn of the N crs of Key West, Fla. (LF) rng and the W crs of Miami, Fla. (LF) rng.

✓**AERONAUTICAL CHART CORRECTIONS:** Correct Aeronautical Charts as follows:

(1) WAC 306 by showing airway between Laramie, Wyo. and Denver, Colo. as Red No. 1 instead of Red 4.

(2) RF Chart 25, dated August 1, 1951 at Dunkirk, N. Y. to include 122.2 mc.

✓**FLIGHT INFORMATION MANUAL CORRECTIONS:** Correct Flight Information Manual, Vol. 5, No. 2, dated June 15, 1951 as follows:

(1) Page 14. Change Corpus Christi, Texas INSAC number to: 4-8112.

(2) Page 14. Add Longview, Texas INSAC number: 3917.

(3) Page 11. Change New Orleans, La. WB number to Kenner 4-2529 and INSAC number to Kenner 4-4166.

(4) Page 15. Change New Orleans, La. Aviation Safety District Office to Victor 6706.

(5) Page 49. Control zones - change Bendix, N. J., Teterboro Air Terminal to Teterboro, N. J., Teterboro Arpt.

Minimum En Route Instrument Altitudes: Green Airway No. 3 - correct by adding:
From: Youngstown, Ohio (LFR) to Mercer (Int), Pa. - Min Alt. 2600'.
From Mercer (Int), Pa. to Philipsburg, Pa. (LFR) - Min. Alt. 4000'.
From Philipsburg, Pa. (LFR) to Slatington (Int), Pa. - 4000'.
From: Allentown, Pa. (LFR) to *Belle Mead (Int), N. J. - Min. Alt. 2500' - 1700' - Minimum crossing altitude at Belle Mead (Int), westbound.
From New Brunswick (Int), N. J. to Matawan (Int), N. J. - Min. Alt. 1500'. Change "900' minimum continuous VOR reception altitude" to read "9000' minimum continuous VOR reception altitude" after "#Selinsgrove, Pa. (VOR) via altitude radial 86 - Int. Selinsgrove VOR altitude radial 86 and Caldwell, N. J. (VOR) altitude radial 288 - *4000'". Add note at end of airway: #This route is associated with this airway, since the route lies within the control area established for this airway.

Green Airway No. 5 - correct by adding: From Homer, Alaska to Skilak (Int), Alaska - Min. Alt. 4000'. Correct to read in part: *Wasilla (Int), Alaska to Gulkana, Alaska - Min. alt. 10,500'.

Amber Airway No. 4 - correct by deleting: From Ft. Worth, Texas (LFR) to Int. N crs. Ft. Worth (LFR) and S crs Oklahoma City (LFR) - Min. Alt. 2000'.
From Int. N crs Ft. Worth (LFR) & S crs Oklahoma City (LFR) to Oklahoma City, Okla. (LFR) Min. Alt. 2500'.

(9-11-51)

Amber Airway No. 6 - correct to read in part: From Union FM, Ky. to Cincinnati, Ohio Min. Alt. 2400'.

Amber Airway No. 7 - correct to read in part: From Hartford, Conn. to Woodstock (Int), Conn. (Northbound) - Min. Alt. 2400'.

Red Airway No. 6 - correct by adding: From Akron, Colo. to Hayes Center, Neb. - Min. Alt. - 5600'. From Hayes Center, Neb. to Curtis (Int), Neb. - Min. Alt. - 4500'. From Curtis (Int), Neb. to Grand Island, Neb. - Min. Alt. - 4500'.

Red Airway No. 59 - correct by changing Garden City, Okla. (LFR) to Garden City, Kans. (LFR).

Blue Airway No. 5 - correct to read in part: From Wichita (LFR) to Newton (Int) - Min. Alt. 2500'.

Blue Airway No. 6 - correct to read in part: From Abilene, Texas (VOR) via radial 24 or 39 to Wichita Falls (VOR) via radial 191 or 206 - Min. Alt. *3000' - 4000' minimum continuous VOR reception altitude.

Blue Airway No. 30 - correct to read in part: From Medina (Int), Texas to C-B Ranch (Int), Texas - Min. Alt. 3500'. From C-B Ranch (Int), Texas to Big Spring, Texas - Min. Alt. - 4000'. San Angelo (VOR) via radial 306 or 321 to Big Spring, Texas (VOR) via radial 125 or 110 - Min. Alt. - 4000'.

Direct Routes SE U. S. - correct to read in part: From Jackson, Miss. (LFR) to Baton Rouge, La. (LFR) - Min. Alt. - 1600'. Correct by deleting: Augusta, Ga. to Atlanta, Ga. - Min. Alt. - 2300'.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.

•• - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (7-25)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (7-16)
BIRMINGHAM-RADIO: June 25, omnirng shut down - relctn.
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. (5-23) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
DOTHAN-NAPIER FLD: Ctn - vehicles on rnwys. (8-20)
EVERGREEN-RADIO: Omnirng flgt-checked, radials 240° clockwise thru 280° displaced counter clockwise 1°. Crs displacement in cone area slightly greater than normal. (8-13)
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn. (5-10) En-route acft contact Montgomery Radio on VHF. (9-6)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20)
MOBILE-RADIO: Aug. 29, LF rng flgt-checked, courses correctly aligned as follows: 37 A 138 N 217 A 318 N.
MONTGOMERY-RADIO: A maximum of one half degree in excess of allowable error will be found in E sector omnirng between radials 90° and 118°. (6-14)
MONTGOMERY-DANNELLY FLD: Rnwy 3-21 clsd days. First 200' clsd ngts. Equip on rnwy. NE taxi strip clsd (const), mrkd. (9-10)
ARIZONA: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (8-27)
LUKE AFB (PHOENIX): Ctn - exten const all rnwys. (2-19) Rnwy 3-21 clsd (const). (5-2)
ARIZONA: PRESCOTT ARPT: Strip at end Rnwy 3-21 clsd - const. Use rnwys only. (8-17)
WINSLOW-RADIO: About Sept. 20, visual-aural rng will be shut down until approx Dec 20 - conversion to VOR fac. (8-29)
ARKANSAS: **CROSSETT ARPT: Correct lat 33-10-45, long. 91-52-15. (6-24)
FLIPPIN-RADIO: Sept. 6, omnirng flgt-checked, opern normal.
FT. SMITH ARPT: Equip. on W end E/W Rnwy. (7-24)
LITTLE ROCK-ADAMS FLD-TOWER: Transmission and reception poor on all VHF freqs S to W account obstns near temp twr until approx Oct. 1. Apch ctl on rng freq. 353 kc not avail until approx Oct. 1. (7-30) FLD: Ctn lndg N or NE, vision of ctl twr partially obstd. (5-14) Lmtd NG svcg. (10-24) Rnwy 14-32 clsd (repairs). (8-6)
ROGERS ARPT: Rnwy lgts inop. (8-28)
TEXARKANA-RADIO: Sept. 5, omnirng shut down until approx Nov. 5 - modernization.
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
CALIFORNIA: BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans jet acft. (8-27)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat. 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea. conditions from 0800 to 1 hr before sunset, daily, Mon thur Sat
CAMARILLO-RADIO: About Sept. 20, stn lctn mrkr will be shut down until approx Oct. 30. (9-6)
CAMP COOKE (LOMPOC): Authorized visiting acft enter on heading of 290° at 2,000' from town of Lompoc, to avoid active firing rngs. (6-25)
CASTLE AFB (MERCED)-RADIO: USAF LF rng unreliable. (7-24)
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (3-13)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CRESCENT CITY-DEL NORTE CO. ARPT: Drifting sand across W end taxi strip leading to Rnwy 11. Use rnwy for taxying only. (9-5)
DAGGETT-RADIO: About Oct 1, VOR will be shut down until approx Oct 15 - modernization.
EDWARDS AFB (MUROC): Lctd within a danger area. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont. to fld.
FT. ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white.
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (8-28)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
★HAMILTON AFB (SAN RAFAEL)-RADIO: USAF Mil Arwys Stn also oper on HF voice freq 4765, 2862; HF CW 8280 kc. (9-7)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (4-5)
LOS ANGELES-RADIO: Visual-aural rng has moderate scalloping in N sector. (9-7)
LOS ANGELES INTERNATIONAL ARPT: Rnwy 7R-25L usable portion reduced to 4500' from apch end 25L, const across W end. Rnwy 25L clsd to take-offs and Rnwy 7R clsd lndgs 0700-1700 daily xcpt Sat and Sun. Rnwys 4-22 and 11-29 clsd (const). Equip. on and adj const area. Use paved areas only. Two green transverse bar lgts mrk threshold Rnwy 25L. New Rnwy extensions and W portion of fld clsd - const. (mrkd). (9-7)
MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. Ext const all rnwys. (8-28)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21)
NEEDLES ARPT, SITE 25A, LAX-AMA: 80 octane gas not avail. (7-19)
NORTON AFB (SAN BERNARDINO): Ctn - equip. on fld days. (3-29)
OAKLAND-RADIO: Omnirng maximum usable dist 40 mi N thru E at minimum instr alt. (6-10)
OAKLAND ARPT: Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. (8-16)
OCEANSIDE ARPT: Lgts inop. (9-2)
PALMDALE-LOS ANGELES CO. ARPT: 70' unlgtd bldg 1200' NW of SW end Rnwy 22. (7-18)
SAN DIEGO-RADIO: Omnirng has lgt to moderate scalloping in all quads. (6-12) Lemon Grove FM on E crs LF rng reduced in pwr to 80 watts. (7-24)
SAN DIEGO-LINDBERGH FLD: Const on ramp adjacent to terminal bldg. (8-14)

CALIFORNIA: SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (2-21)

SAN DIEGO-NAS SEAPLANE BASE: Sealane mrkrs under const. Perm pile-mounted day mrkrs and seadrome lgts are being installed in S San Diego Bay to delineate the sealanes. There are two sealanes each 1000' wide, extending NW/SE 14,875', E/W 9,872'. Bndrys and ends of lanes mrks, day, ngt. Ctn during lndg and take-off. It is also noted that due to mrkrs being pile-mounted the height above water will vary with the state of the tide.

SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)

SAN FRANCISCO ARPT: Apch lgts inop. Rnwys clsd days intermittently. Taxi with ctn. Equip. on fld days. (6-27)

SANTA ANA MCAF-LTA: Hrs opern: 0800-1630, Mon-Fri, 0800-1200 Sat and daily to sunset on 30 min notice. (7-20)

SANTA BARBARA-RADIO: About Sept 15, visual-aural rng will be discont. (8-26)

SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end Rnwy 25 perm clsd to acft with 20,000 lbs or more gross wt. (8-20)

SANTA MONICA ARPT: Rnwy 4-22 clsd. (9-4)

SONORA-COLUMBIA ARPT: NW/SE Strip clsd. (8-2)

VAN NUYS ARPT-TOWER: About Sept 14, CAA twr freq will be changed from 219 kc to 227 kc. (9-7)

COLORADO: SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U.S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (8-24)

COLORADO SPRINGS: Small arms, mortar and artillery firing being conducted in entire area of Camp Carson Military Reservation during all hrs thru Sept 30, 1951. Area extends from lat 38-45-00, on N to lat 38-30-00, on S, and from long. 104-43-00 on E to State Hwy No. 115 on W. Caution advised all acft operating on Amber Arwy #3 in vcnty; operations should be conducted E of S crs of Colo. Sprgs. LF rng. (8-24)

DENVER NAS (BUCKLEY FLD)-RADIO: Navy X-band Radar Bcn, code 2-1-1, inop. (4-26)

DENVER NAS (BUCKLEY FLD): Rnwy 14-32 clsd (obstn). Taxi strip to Rnwy 7-25 under const. Acft may be routed to Lowry AFB in crosswind conditions. (8-9)

GRAND JUNCTION-RADIO: CAA ILS lclzr and glide path will be shut down Sept 4 until approx Sept 25. (8-7)

LAMAR-RADIO: Omnirng radials displaced counterclockwise as follows: 345° to 15° displaced 4°, 142° to 150° displaced 4°, 162° to 216° displaced 6°. (6-15) Soon omnirng will be shut down until approx Nov 3. (8-25)

PUEBLO: Ordnance depot approx 17 mi E at lat 28-16-53, long. 104-18-09, conducting all types of demolition work 0800-1630 daily, Mon thru Fri, during month of Sept. (9-3)

PUEBLO-RADIO: Aug 25, omnirng shut down until approx Sept 25-modification (8-24)

PUEBLO ARPT #1: Ctn-lndg Rnwy 26 and take-off Rnwy 8. 30' obstn in State Fairgrounds lctd 700' E and in line with Rnwy 8-26. (9-3)

TRINIDAD ARPT: Const-medium intensity rnwy lgts being installed Rnwy 3-21. Use rnwys only. (9-10)

CONNECTICUT: E. HARTFORD-RENTSCHLER ARPT: VFR flgt test operns days all alts in 75 mi radius. (1-4) 80' crane 500' NW apch end Rnwy 4 days. (9-5)

NEW HAVEN ARPT: Taxi strip from Admin. Bldg on N end Rnwy 1-19 clsd. Const N end Rnwy 1-19. (6-15)

WINDSOR LOCKS-BRADLEY FLD: 80' lgtd Admin Bldg under const S end. (6-23)

DELAWARE: DOVER-RADIO: Visual-aural rng operg gnd-checked basis only. (9-10)

DOVER AFB-RADIO: USAF rng gnd-checked only. Reliable for homing only. (7-19)

DOVER-SUNGLO FLD: Hwy const adj to the W. (7-10)

FORT MILES: Overwater Controlled Firing Area in vcnty formerly approved on a seasonal basis, is now rqrd on a yearly basis. Area is described as follows: Beginning at lat 38-45-30, long. 75-01-24; SE to lat 38-43-00, long. 74-57-10; SSE to lat 38-38-50, long. 74-55-33; W to lat 38-37-54, long. 75-03-50; northerly along the shoreline at lat 38-40-45, long. 75-04-09; NE to point of beginning. Time of Use: May to Oct 1300-1900, Nov to Dec 0800-1730. Activities: Anti-acft firing. Controlling Agency: 2nd Army, Ft. Miles, Dela. Effective Date: Jan 5, 1951.

DELAWARE: GEORGETOWN-SUSSEX COUNTY ARPT: Heaves in pavement Rnwys 4-22, 16-34. (8-27)

★WILMINGTON-RADIO: Z mrkr flgt-checked and re-cmsnd Aug 31.

WILMINGTON-NEW CASTLE CO. ARPT: Jets and other mil acft operg daily. Two 465' unlgtd bridge twrs erected across Delaware Riv 4 mi ENE. (7-16)

DIST. OF COLUMBIA: SPECIAL NOTICE: Attention must again be brought to pilots operg in the Washington National Airport Area regarding close adherence to the established tfc patterns. The CAA is receiving an alarming increased number of complains regarding "Noise Nuisance" from communities in the vicinity, especially from Alexandria. It is felt that some of the complaints are justified in view of the many reports of low flying from communities some distance from the airport. The Administrator of Civil Aeronautics is desirous of having all pilots use the maximum permissable altitudes rather than the 1200' minimum in the proper pattern procedures on approaching Washington National Arpt.

ANACOSTIA NAS: All pilots clearing to Anacostia NAS under IFR should be thoroughly familiar with all Washington area rdo and communs facs, the reporting points, all holding pats, and let down procedures, inclg "TIMED APCHS". (11-1)

ANACOSTIA NAS-RADIO: Navy VHF/DF inopr repairs. (4-30)

ANACOSTIA NAS-TOWER: Effect Aug 16, Navy twr placed in lmtd opern pending completion twr modernization. Call Navy Anacostia Twr on published freq for taxi, landing, take-off and ATC clearnace. In event of voice commun failure, shift to Bolling AFB twr on published freqs. (8-15)

BOLLING AFB: Lmtd trans quarters. (7-12)

WASHINGTON-SPECIAL NOTICE: CAA regards Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac River. Acft remain clear of U.S. Naval Medical Center, Bethesda, Md., lat 39-00-30, long. 77-05-30. Beginning June 11, avoid low flying over Watergate area lctd adj Memorial Bridge and 6 mi N of Washington Nat'l Arpt-concert.

WASHINGTON-RADIO-SPECIAL NOTICE: The following facs are to be used as an aid to any acft, military or civilian, that is known or believed to be in distress:

(9-11-51)

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective 0001 EST, October 2, 1951, unless otherwise advised, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red civil airway No. 10 (Pueblo, Colo. to Charleston, S. C.) is amended by changing the portion between Atlanta, Ga. rdo rng stn and the Charleston, S. C. rdo rng stn to read: Atlanta, Ga. rdo rng stn, excluding the portion which overlaps the Camp Gordon, Ga. danger area, to the Augusta, Ga. rdo rng stn. From the intsxn of the NE crs of the Augusta, Ga. rdo rng and the NW crs of the Charleston, S. C. rdo rng to the Charleston, S. C. rdo rng stn.

(2) Red civil airway No. 54 (Burley, Idaho to Salt Lake City, Utah) is amended by deleting the words: Strevell, Idaho non-directional rdo bcn;

(3) Red civil airway No. 68 (El Paso, Texas to Shreveport, La.) is amended by changing the first portion to read: "From the El Paso, Texas omnirng stn via the Hudspeth, Texas omnirng stn; the Culberson, Texas omnirng stn; the intsxn of the Culberson omnirng 90° true enroute radial and the Midland omnirng 234° true en route radial to the Midland, Texas omnirng stn."

(4) Red civil airway No. 69 is amended to read: (Culberson, Texas to Big Spring, Texas) From the intsxn of the Culberson, Texas omnirng 90° true en route radial and the Wink, Tex. omnirng 235° true en route radial to the Wink, Texas omnirng stn. From the Midland, Texas rdo rng stn to the intsxn of the NE crs of the Midland, Texas rdo rng and the SW crs of the Big Spring, Texas rdo rng.

(5) Red civil airway No. 81 (Cadillac, Mich. to Elkins, W. Va.) is amended after the portion which reads: "to the Toledo, Ohio omnirng stn" by adding a portion to read: "from the Toledo, Ohio omnirng stn to the Columbus, Ohio omnirng stn". .....

(6) Red civil airway No. 103 is amended to read: (Indianapolis, Ind. to Cleveland, Ohio) From the Indianapolis, Ind. omnirng stn via the Findlay, Ohio omnirng stn to the Cleveland, Ohio omnirng stn.

(7) Red civil airway No. 109 is added to read: (Toledo, Ohio to Mansfield, Ohio) From the Toledo, Ohio omnirng stn to the Mansfield, Ohio omnirng stn.

(8) Red civil airway No. 110 is added to read: (Santa Fe, N. M. to Anton Chico, N. M.) From the Santa Fe, N. M. omnirng stn to the Anton Chico, N. M. omnirng stn.

(9) Blue civil airway No. 18 is amended by changing caption to read: (Philadelphia, Pa. to U. S. Canadian Border) and by changing last portion to read: Albany, N. Y. rdo rng stn; Burlington, Vt. rdo rng stn to the intsxn of the NE crs of the Burlington, Vt. rdo rng and the U. S. Canadian Border.

(10) Blue civil airway No. 85 is added to read: (Hutchinson, Kans. to Wichita, Kans.) From the Hutchinson, Kans. rdo rng stn to the intsxn of the S crs of the Hutchinson, Kans. rdo rng and the SW crs of the Wichita, Kans. rdo rng.

CONTROL AREAS: (1) Red civil airway No. 1 (Portland, Oregon to Kansas City, Mo.) is amended by deleting the portion which reads: from the Salina, Kans. omnirng stn to the Topeka, Kans. VHF VAR rdo rng stn via the Salina, Kans. omnirng direct en route radial; from the Topeka, Kans. VHF VAR rdo rng stn to the Kansas City, Mo. omnirng stn via the Kansas City, Mo. omnirng direct en route radial; and by ADDING in lieu thereof: from the Salina, Kans. omnirng stn to the Topeka, Kans. omnirng stn via the direct en route and 15° S alt change radials; from the Topeka, Kans. omnirng stn to the Kansas City, Mo. omnirng stn via the direct en route radials.

(2) Red civil airway No. 10 (Pueblo, Colo. to Charleston, S. C.) is amended by DELETING the portion which reads: From the Augusta, Ga. omnirng stn to the Charleston, S. C. omnirng stn via the direct en route and 15° S alt change radials.

(3) Red civil airway No. 69 is amended by changing caption to read: (Culberson, Texas to Big Spring, Texas).

(4) Red civil airway No. 70 (Midland, Texas to Oklahoma City, Okla.) is amended by adding the following portion to present control areas: including the area from the intsxn of the Lubbock, Texas omnirng 199° true en route radial and the Hobbs, N. M. omnirng 86° true en route radial to the Lubbock, Texas omnirng stn via the Lubbock omnirng 199° true en route radial.

(5) Red civil airway No. 88 (Albuquerque, N. M. to Hobbs, N. M.) is amended by ADDING the following portion to present control areas: from the Hobbs, N. M. omnirng stn to the intsxn of the Hobbs omnirng 86° true en route radial and the Lubbock, Texas omnirng 199° true en route radial via the Hobbs omnirng 86° true en route radial.

(6) Red civil airway No. 103 is amended to read: (Indianapolis, Ind. to Cleveland, Ohio) All of Red civil airway No. 103.

(7) Red civil airway No. 109 is added to read: (Toledo, Ohio to Mansfield, Ohio) All of Red civil airway No. 109.

(8) Red civil airway No. 110 is added to read: (Santa Fe, N. M. to Anton Chico, N. M.). All of Red civil airway No. 110.

(9) Blue civil airway No. 18 is amended by changing caption to read: (Philadelphia, Pa. to United States Canadian Border).

(10) Blue civil airway No. 85 is added to read: (Hutchinson, Kans. to Wichita, Kans.) All of Blue civil airway No. 85.

CONTROL AREA EXTENSIONS: Control area extension (Charlotte, N. C.) is amended to read: All that area within a 25 mile radius of the Charlotte, N. C. rdo rng stn and all that area within 5 miles either side of the Charlotte ILS lcizr extending from the lcizr to a point 30 miles SW.

(2) Control area extension (Memphis, Tenn.) is amended to read: All that area within a 25 mile radius of the Memphis, Tenn. rdo rng stn and all that area within a 10 mile radius of the Memphis Naval Air Station excluding the portion which lies within Amber Civil Airway No. 5.

(3) Control area extension (Charleston, S. C. is revoked.

(4) Control area extension (Enid, Okla.) is amended to read: All that area within a 25 mile radius of the Enid, Okla., Vance AFB rdo rng stn.

(5) Control area extension (Mansfield, Ohio) is amended by adding the following to present control area extension: including all that area W of the Mansfield omnirng stn bounded on the SE by Red civil airway No. 85, on the SW by Red civil airway No. 55 and on the N by red civil airway No. 17.

CONTROL ZONES: (1) 5 mile control zone section is amended by adding the following airports: Phoenix, Ariz., Luke AFB; Mountain View, Calif., Moffett NAS; by deleting the following airport: Sunnyvale, Calif., Moffett Field and by correcting airport names as follows: from Philipsburg, Pa., Black Moshannon Arpt to Philipsburg, Pa., Philipsburg Arpt. from Portland, Oregon, Portland AAF to Portland, Oregon, Portland International Arpt. from Reno, Nevada, Hubbard Field to Reno, Nevada, United Air Lines Arpt.

(2) Minneapolis, Minn. control zone is amended to read: Within a 5 mile radius of the Minneapolis, St. Paul International Arpt extending 2 miles either side of the SE crs of the Minneapolis rdo rng to the Hastings FM.

(3) Augusta, Ga. control zone is amended to read: Within a 5 mile radius of Bush Field, Augusta, Ga. extending 2 miles either side of a direct line from Bush Field to the Augusta, Ga. rdo rng stn and extending 2 miles either side of the W crs of the Augusta rdo rng to a point 10 miles W of the rdo rng stn.

(4) Andrews, Md. control zone is added to read: Within a 5 mile radius of the Andrews, Md. Air Force Base extending 2-1/2 miles either side of the N crs of the Andrews AFB rdo rng to the Andrews AFB rdo rng stn.

REPORTING POINTS: (1) Red civil airway No. 68 is amended to read: (El Paso, Texas to Shreveport, La.) Hudspeth, Texas omnirng stn; Culberson, Texas omnirng stn; Midland, Texas omnirng stn; the Midland, Texas rdo rng stn.

(2) Red civil airway No. 69 is amended by changing caption to read: (Culberson, Texas to Big Spring, Texas).

(3) Red civil airway No. 103 is amended by changing caption to read: (Indianapolis, Ind. to Cleveland, Ohio).

(4) Red civil airway No. 109 is added to read: (Toledo, Ohio to Mansfield, Ohio). No reporting point designation.

(5) Red civil airway No. 110 is added to read: (Santa Fe, N. M. to Anton Chico, N. M.) No reporting point designation.

(6) Blue civil airway No. 18 is amended by changing caption to read: (Philadelphia, Pa. to U. S. Canadian Border).

(7) Blue civil airway No. 85 is added to read: (Hutchinson, Kans. to Wichita, Kans.) No reporting point designation.

(8) Other reporting points are amended by deleting the following compulsory reporting point: Midland, Texas omnirng stn.

NEW SECURITY RULES

Effective September 30, the Administrator of Civil Aeronautics designates four new domestic Air Defense Identification Zones (ADIZ) and changes the boundaries of the existing domestic zones to make compliance and position reporting easier for pilots.

The filing of flight plans and the making of position reports is mandatory for aircraft flying into or within an ADIZ, and all pilots will comply with the Regulations of the Administrator Part 620.

Exceptions

There is one important exception to the flight plan and position reporting requirement which applies to Domestic ADIZ flights only. Flight plans and reports are not required on VFR flights which are confined to altitudes of less than 4,000 feet above the immediate terrain.

In addition to this automatic exception, the CAA may waive the flight plan and reporting procedures for VFR flights under certain conditions set forth in Part 620.13.

IFR Flights

The filing of flight plans and making of position reports under IFR is conducted as in the past, and the pilot will meet all ADIZ requirements by following standard IFR procedures, described in Part 60 of the Civil Air Regulations. Flight plans must be filed, however, for off-airways as well as on-airways IFR flights.

DVFR Flight Plans

With the exception of low-altitude flight mentioned earlier, pilots must be equipped with two-way radio when flying within an ADIZ. This requirement applies regardless of altitude for flights entering a Coastal or International Boundary ADIZ.

When a Defense Visual Rule Flight Plan is required, it shall include the estimated time, position and altitude at which the flight will penetrate the ADIZ. As an alternate, it may include the time, position, and altitude at which the aircraft passed the last reporting point prior to penetration of an ADIZ and its estimated time over the next reporting point in its path.

If a pilot complies with the DVFR requirements above, he is not required to make additional position reports, unless his previously filed estimate appears to be in error by more than five minutes or 20 miles. Under such circumstances, he shall file a corrected estimate with an appropriate aeronautical facility.

The pilot shall not deviate from his DVFR flight plan unless he gives prior notification. He may commence his descent within 20 miles of his destination, however, without reporting change of altitude.

Radio Failure

In case of radio failure on IFR flight, the pilot shall follow the normal IFR procedure described in Part 60 of the Civil Air Regulations.

If radio failure occurs on a DVFR flight, the pilot may proceed in accordance with his original DVFR flight plan. As soon as possible, however, he shall make a report of such failure to an appropriate aeronautical facility.

Emergency Situations

Where the safety of a flight is involved, the pilot may deviate from ADIZ requirements as necessary to meet the emergency. When this occurs, however, he shall report the deviation and the reasons for it as soon as practicable.

Under emergency defense conditions which may involve the national security, pilots shall follow any additional special security instructions issued by the CAA for the identification, location and control of individual flights.

Prohibited Areas

There are prohibited areas within the Albuquerque, Seattle and the Knoxville ADIZs. All aircraft are excluded from these areas for reasons of National Defense.

Foreign Aircraft

Foreign aircraft entering the United States through a Coastal or International ADIZ shall make the same position reports required of United States aircraft. As an alternative, pilots of foreign aircraft may report when the aircraft is between one and two hours average cruising distance, by the most direct route, from the United States, and thereafter report as instructed by the facility receiving the original report. Aircraft operating under the latter procedure must, of course, make any additional reports required for control of air traffic.

Violations

In addition to the penalties provided for violation of the Civil Air Regulations, knowing or wilful violation of the ADIZ requirements may result in a fine of up to $10,000, or imprisonment up to one year, or both.
